## THINK IN SYNC MOVE INTO A NEW ERA

Nissan Intelligent Mobility redefines the way we power, drive and integrate cars in our lives. Step inside the Nissan QASHQAI and you'll soon discover a suite of intelligent technologies that make you more confident behind the wheel. From Intelligent Park Assist\* to Intelligent Emergency Braking with Forward Collision Warning†, the Nissan QASHQAI constantly looks out for you and those around you.

# GET A HAND WHEN YOU WANT IT CHOOSE THE MOMENT TO SHARE CONTROL

Nissan Intelligent Mobility takes your driving experience to the next level. Experience the exhilarating feeling of entrusting the Nissan QASHQAI as its Intelligent Driving technologies give you more confidence and control. It's another bit of help that makes every single road a better and safer place to be.

## INTELLIGENT PARK ASSIST WITH REAR CROSS-TRAFFIC ALERT<sup>†</sup>

Let the Nissan QASHQAI take over steering duties in tight parking spots – and let Rear Cross-Traffic Alert<sup>†</sup> warn you of approaching traffic when you reverse.

<sup>†</sup>TI models only <sup>‡</sup>Excludes ST

# INTELLIGENT AROUND VIEW<sup>®</sup> MONITOR<sup>†</sup> 360° VIEWS MAKE PARKING EASIER THAN EVER

## DON'T BUMP YOUR HEAD

In Drive, the display gives you both a front and overhead view, so you know just how far to pull up, without going too far.

## SWITCH ANGLES AGAIN AND AGAIN

In Drive or Reverse, you can push the camera button to switch out the overhead for a side view. A great help for seeing how close you are to the kerb.

## COMPLETE THE PICTURE

Located under your side mirrors, these cameras help round out your virtual 360° bird's-eye view, whether you're in Drive or Reverse.

## EYES IN THE BACK OF YOUR HEAD

In Reverse, the display helps you see what's directly behind you, while the overhead view helps with smaller objects that might be hidden below your window.

<sup>†</sup>Driver's aids only and should not be used as a substitute for safe driving practices. Always monitor your surroundings when driving. Only available on ST-L & TI Models

# GET A HAND WHEN YOU WANT IT STEPS IN WHEN YOU NEED IT

Nissan's Intelligent Mobility Driving technologies use advanced radar technology to constantly monitor activity going on around you, keeping tabs on the traffic and helping you handle any unexpected situations.

## INTELLIGENT LANE INTERVENTION<sup>††</sup>

When driving, if the vehicle senses that you may be veering outside of your lane, the vehicle will apply subtle brake pressure to help keep you on the safe path.

## INTELLIGENT EMERGENCY BRAKING<sup>†</sup>

Using radar technology to keep an eye on your proximity to the vehicle ahead of you, Forward-Collision Warning can give you audible and visual display warnings to help you know when to reduce your speed. If required, the Intelligent Emergency Braking<sup>†</sup> will apply braking to reduce vehicle speed to avoid or reduce the severity of a collision.

## BLIND SPOT WARNING<sup>††</sup>

Boost your vision: the system will warn you if there are vehicles in the blind spots diagonally behind the car.

## LANE DEPARTURE WARNING<sup>†</sup>

If there is a risk of your vehicle leaving the traveling lane unintentionally, the system provides visual and audio alerts to prompt you to take action.

# RESPONDS SEAMLESSLY TO THE ROAD AROUND YOU

The Nissan QASHQAI is an exhilarating drive thanks to Nissan's Chassis Control technologies -it gives you greater agility and responsiveness, yet still manages to be smooth to handle and secure to drive.

## INTELLIGENT ENGINE BRAKE<sup>†</sup>

This technology adds engine braking and reduces the burden when cornering or braking for vehicles fitted with CVT. By minimising the frequency and effort normally required to brake the vehicle, it makes for an easier and more comfortable drive.

## ADAPTIVE FRONT LIGHT SYSTEM (AFS)<sup>†\*</sup>

AFS improves your night visibility. When you're on a dark, winding road AFS changes the angle of the light to compensate for any curve and if you're at a crossroads it illuminates your chosen direction – either to the left or right.

## INTELLIGENT RIDE CONTROL<sup>†</sup>

Take the rough with the smooth. This system applies subtle braking to prevent disturbance when encountering bumps and ensures a comfortably smooth ride.

# ST

## Specifications

- 17 inch Aero alloy wheels
- Halogen headlights
- LED Daytime Running Lights
- LED Taillights
- Power-adjustable door mirrors with LED indicators
- Intelligent Key® with push button engine start
- Leather-accented\* steering wheel, shift knob, gear shift boot and knee pad
