a new era 100% electric

A new automotive era has begun. With all-new Renault Megane E-Tech 100% electric, pure emotion and controlled technology combine for an innovative mobility experience.

Bringing you such an experience was simply a matter of pushing the boundaries. So that’s what we did.

160 kW of power	from 0 to 100 km/h in 7.4s	up to 454 km WLTP driving range
openR system: complete customisation	440 litres of boot volume	20 advanced driver-assistance systems

06. customisation

pure design

Sporty and aerodynamic, the bodywork of all-new Renault Megane E-Tech 100% electric combines the body of a compact hatch with crossover styling. The extended wheelbase and large 20" wheels convey a totally unique personality.

It's all about style. With a range of body colours and contrasting two-tone roof options available, paired with the LED front lighting signature and 3D moiré effect strip at the rear, electric has never looked so good.

ergonomics reinvented

The new driver-oriented cockpit features an expansive on-board digital surface: the openR, spread over a 12" digital instrument cluster and a 9" central touchscreen.

The controls grouped around the steering wheel free up space for a clean, intuitive layout.

pure electric sensation

Acceleration is vigorous, linear and muscular: with the 160kW motor, it takes just 7.4 seconds to go from 0 to 100 km/h. Regenerative braking adds to performance: as soon as you decelerate, you recover energy.

The steering is agile and direct; the chassis is dynamic and the centre of gravity is low. All-new Renault Megane E-Tech 100% electric reveals its sporty DNA.

With controls at your fingertips as you focus on the road, never has the driving experience been so pleasurable.

all the vehicle's main controls are centralised around the steering wheel: driver-assistance systems, call management, voice recognition activation

12.3" screen that can be customised according to the driving mode: sport to increase power and responsiveness, eco to increase efficiency, comfort for the perfect compromise, and perso for complete customisation.

02. driving range and charging

454 km driving range⁽¹⁾

Renault Megane E-Tech 100% electric is the result of innovative research and development that pushes the limits of performance and efficiency: optimised weight distribution, a longer wheelbase, and an extremely low centre of gravity.

Its new platform houses an ultra-flat 60 kWh battery and a compact 160 kW electric motor for a range of up to 454 km.

aerodynamic design

The lines of Renault Megane E-Tech 100% electric have been designed to maximise aerodynamics through the vehicle’s height, roof design, narrow-sided tyres, and sculpted bumpers.

optimal weight

Weighing in at just 1,642kg thanks to its aluminium doors and various patented innovations, Renault Megane E-Tech 100% electric is one of the lightest electric vehicles in its category, meaning even greater driving range at equivalent power.

heat management

Renault Megane E-Tech 100% electric is equipped with a system that automatically regulates battery and motor temperature. To optimise performance, charging and range, the cooling systems help maintain the temperature of the motor and battery.

driving range

- up to 454 km⁽¹⁾

(1) based on WLTP (Worldwide Harmonised Light-Duty Vehicles Test Procedure) static laboratory combined average city and highway cycle test, which measures energy consumption, range and emissions in passenger vehicles, designed to provide figures closer to real-world driving behaviour. Real life driving results will vary depending on driving style, type of journey, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions.
overseas model shown.

charging made easy

You have access to a broad range of solutions for charging at home, at work, or on the go.

Renault Megane E-Tech 100% electric is delivered with a mode-3 type cable that can be used with a domestic⁽¹⁾ or public charging stations.

**charging at home,
at work, or elsewhere**

Charge Renault Megane E-Tech 100% electric easily on the domestic grid using a domestic charging point⁽¹⁾ or a standard domestic power socket⁽²⁾.

At home, our local supplier partners⁽¹⁾ offer you the most suitable range of charging points and sockets for your needs, and will assist you in their installation and use.

on-street charging

An evening at the cinema? With your smartphone, locate the public charging stations closest to your destination.

For longer journeys, get up to 300 km of driving range in 30 minutes at a rapid charging station.

05. advanced driver-assistance systems

a suite of advanced driver-assistance systems

As part of the human first program, All-new Renault Megane E-Tech 100% electric comes with 20 innovative driver-assistance systems.

lane keeping assist
Corrects the angle of the steering wheel, returning the vehicle to its lane unless you have indicated.

safe following distance warning
The front radar calculates safety distances and triggers an audible and visual warning in the event of a risk of collision.

adaptive cruise control
This system keeps a safe following distance with the vehicle in front. It activates the brakes when you get too close, and accelerates when the road is clear again.

blind spot warning and lane departure prevention
The vehicle automatically corrects its trajectory if a collision is foreseeable when changing lane.

smart rear-view mirror
This system uses a camera fitted at the top of the vehicle's rear window, with the interior rear-view mirror showing the clear, unobstructed view image of the road from the rear.

rear parking space exit warning
This warns you in the event of obstacles at the rear of the vehicle.

driver-assistance systems

- hill start assist
- automatic dipped/main beam headlight activation
- adaptive vision LED lights (with integrated fog lamp function)
- adaptive cruise control with stop and go
- speed limiter
- smart rear view mirror

park assist systems

- rear parking sensors
- front parking sensors
- side parking sensors
- rear view camera

safety assistance

- lane departure warning with lane keep assist
- safe following distance warning
- blind spot warning
- blind spot intervention
- rear cross traffic alert
- rear active emergency braking
- active emergency braking with pedestrian & cyclist detection
- active emergency braking with junction assist
- smart traffic sign recognition
- driver attention alert

accessories

towbar, roof bars and ski/board rack.
Tow or carry your bicycle rack, trailer or boat safely thanks to the tow bar. The roof bars can be used to add a ski or wakeboard rack.

roof customisation stickers
Express your vehicle's personality, give it a distinctive and energetic style with the motif based on the new Renault logo. Their custom-made shape perfectly matches the contours of the shark fin antenna.

false floor
An ideal storage compartment for your electric vehicle. Both your charging cables and your belongings are neatly and securely stored in your boot. It also lifts the boot floor height, making it easier to load heavier items.

easyflex modular boot protection
Non-slip and waterproof, it protects your boot and your boot sill. It can be used to transport dirty objects (or pets!) and adapts to the position of the rear seats.

modular boot organiser
This clever storage accessory holds your luggage in place during transport

overseas model shown

the human first program is a comprehensive safety programme developed by Renault in cooperation with researchers, experts and firefighters.

as road safety concerns all road users, whether pedestrians, cyclists or motorists, the human first program by Renault aims to:

1. prevent accidents by developing safety equipment and advanced driver-assistance and safety systems

a suite of safety systems - both active for preventing accidents, and passive for mitigating the impact of an accident should one occur. Renault have filed more than 2,000 safety-related patents since 1970

2. manage accidents by drawing on innovations developed with firefighters

QRescue/Fireman Access/more than 5,000 firefighters trained in the past 10 years in 17 countries around the world / approximately 600 cars donated per year for fire-service training

glossary

E-Tech

100% electric, hybrid or plug-in hybrid technology developed by Renault.

regenerative braking

Energy recovery system during braking, which increases the vehicle's driving range: whenever the vehicle slows down, part of its kinetic energy is converted into electricity. The battery recharges when the driver lifts their foot off the accelerator pedal or presses slightly on the brake pedal.

domestic charging point

Delivers a much higher intensity than a standard domestic socket, for more efficient and faster charging. It enables safer home charging thanks to its systems for controlling charging and protecting against overvoltage.

mode 2

For domestic use, this cable is needed to charge an electric vehicle using conventional wall sockets. It is designed for occasional use.

mode 3

This cable is needed to charge the electric vehicle using a wallbox or public infrastructure.

useful capacity

Amount of energy contained in the battery that can be used by the vehicle. Value expressed in kilowatt hours (kWh).

kWh

Abbreviation for kilowatt hours. Unit of energy which corresponds to 1 kW of power consumed for 1 hour.

kW

Abbreviation for kilowatts. Unit that measures the power of a vehicle's engine, whether it is an electric motor or an internal combustion engine. The kilowatt can also measure the direct current (DC) or alternating current (AC) charging power.

AC charge

Low to medium power alternating current charging (maximum 22kW). This is the charging method most commonly found in homes or at many public charging points.

DC charge

Rapid direct current charging (50 kW minimum). Requires a specific fast charging station, found most commonly along motorways.

Renault at your side

When you choose a Renault, you enjoy years of worry-free motoring, backed by a trusted and reliable brand.

Comprehensive Warranty

Renault has been building motor vehicles for more than 100 years. This wealth of experience is reflected in the design, performance and quality of every vehicle we sell. We’re so confident that your new Renault will provide you with many years of reliable and enjoyable driving that we’re backing our quality promise with a comprehensive 5 years / 100,000 kilometre warranty on the Megane E-Tech 100% Electric, with a battery warranty of 8 years / 160,000km-.

24/7 Roadside Assistance

As a new Renault Megane E-Tech owner, you are backed by Renault’s 24/7 Roadside Assistance for 5 years, regardless of how many kilometres you travel. Available 365 days a year, all across Australia. This assistance also covers you in the event that you run out of charge while on the go, in which case your vehicle will be towed to the nearest charging point.

1-year / 30,000km Service Intervals

You’ll enjoy the benefits of less maintenance behind the wheel of your new Renault. The Megane E-Tech only requires servicing once per calendar year or every 30,000 km (whichever occurs first).

Genuine Renault Parts

Parts, lubricants and accessories are of the highest quality and are specifically designed for Renault vehicles. They are purpose-built, guaranteeing fit, function and performance. They are also covered by our 1 year unlimited kilometre warranty.
