## Be more Elroq

The future is electric and it will come in all sizes. With the new Elroq, our electric cars enter a new segment. A smaller, more agile take on our already proven and popular tech. It is also our first model to introduce our Modern Solid design language to series production.

On the outside, the signature element of the Modern Solid design language is the sleek and stylish Tech Deck Face, which will become the distinctive feature of all future Škoda electric models. The Air Curtains emphasise our focus on efficiency by making the Elroq one of the most aerodynamic Škoda models to date, boasting an aerodynamic coefficient of 0.26. With a selection of batteries of up to 82 kWh and several choices of single or dual motor drivetrains, this allows the new Elroq to achieve more than 500 km of range.

The interior will pamper the driver and passengers with state-of-the-art ergonomics and a complete package of displays and screens, including the optional Augmented Reality Head-up display. At the same time, the upholstery was made with specific attention to sustainability, including the use of recycled materials.

With the new Elroq, the future is not only electric. It is also full of style and driving enjoyment, while also being environmentally friendly.

## The world of Modern Solid

As the first production model to use the Modern Solid design language, the Elroq stands out with its bold and dynamic looks built out of straight lines and sleek shapes. The stylish look is highlighted by elements like the sharply-styled headlights or newly designed front bumper with Unique Dark Chrome front spoiler.

### Tech Deck Face

The Tech Deck Face is a modern, glossy black interpretation of the traditional Škoda grille, which also houses functional elements like front radar. It is flanked by the sleek, dynamic running lights, while the main headlights are mounted lower.

### Aerodynamic rear

The powerful Modern Solid design language continues in the rear, with the large black diffuser with Unique Dark Chrome insert and angular Air Curtain outlets on the sides. The rear lights with dynamic turn signals are a subtle finishing touch.

#### **Virtual pedal**

The tailgate can be equipped with a virtual pedal enabling contact-free access. This is available exclusively in the Sportline model with the electrically-controlled 5th door and KESSY.

#### **KESSY**

With the new version of KESSY (Keyless Entry, Start and exit System), all doors can be used to unlock or lock the car. The Walk Away function also locks the car automatically once you leave the vicinity of the car.

### Modern and sustainable

The Timiano green colour is certainly not the only thing green about it. Available in two Design Selections, the simple and spacious interior focuses on providing a sumptuous experience in a sustainable way. That's why it uses modern eco-friendly materials like Econyl, Recytitan, and Technofil, made from recycled materials such as PET bottles, nylon from fishing nets or repurposed clothing. Being sustainable has never looked so stylish.

\*orange seatbelts not available on NZ models.

#### Cockpit of the future

The small Virtual Cockpit display of the Elrøq was specifically designed to only show the most important information for a driver of an electric car. Besides standard driving data, you can highlight navigation, driving assists, or both. Everything can also be displayed on the optional Augmented Reality Head-Up display, like the "floating" navigation arrows.

#### Always in control

All the information that you need, always where you need it. The combination of Virtual Cockpit, 13" Infotainment display, and optional Augmented Reality Head-up display will show the most important information right in front of you, allowing you to focus on what really matters.

#### The new steering wheel

The multifunctional steering wheel comes with leather upholstery as standard and displays lettering instead of the badge on the steering wheel, complimenting the Modern Solid design language.

#### Infotainment

The world at your fingertips. With a 13" touchscreen, the Škoda Infotainment offers an even clearer way of displaying all the information and entertainment features that will make travelling a truly enjoyable experience. Operation is smoother and faster thanks to the new generation of MIB system.

#### Electric seats

The seats offer a sporty shape with lots of lateral support, yet remain supremely comfortable. They are electrically adjustable and offer a memory function. The upholstery makes use of sustainable recycled materials.

#### Ambient lighting

The attractive looks and tactile surfaces of the interior are complemented by the ambient lighting with a wide choice of colours to suit your mood in any moment. Simple, yet so varied!

#### Always charged

The phone box provides wireless 15 watt charging for your smartphone with cooling to prevent your device from overheating. This compartment is easily accessible and offers space for a second smartphone beside the one being charged.

#### Jumbo box and the centre console

Electronic devices can be safely stored in the Jumbo box in the front armrest, while small items can be placed in a removable tray. And when the air conditioning is on, you can even cool your snacks. There are also two easy-open cupholders.

#### Rear armrest

The rear armrest with a pair of cupholders can be folded out when the rear middle seat is unoccupied. The cupholder cover helps to stabilise the drinks in case of heavy braking.

Note: Interior shown is not available in NZ

## Little things that make a big difference

Even the simplest details can make your everyday experience much better. A plethora of small, ingenious ideas that will surprise you and make your life on the road that much easier.

#### Storage compartment

Rear passengers can now also have everything they need easily to hand. The storage compartment fits over the centre tunnel and provides space for smaller items, phones, or drinks.

#### Boot space

In its standard configuration, the Elroq offers 470 litres of cargo space. If you need even more space, you can increase the useable volume to 1,580 litres by folding down the rear seats. And it is not just about space – with its various smart features and compartments, the Elroq takes the ease of transporting both small and large things to another level.

#### Charging cable net

The net pocket under the boot cover, available in the package with the Virtual pedal, offers a convenient place to store your charging cable and always have it at hand, even when the boot is full.

### Connectivity

With Apple CarPlay or Android Auto, you can safely and easily use selected smartphone apps on the infotainment screen.

#### Turn Assist and Collision Avoidance Assist

Turn Assist monitors opposing traffic when turning right at low speeds between 2–15 km/h. In critical situations, it can stop the vehicle and turn on the warning lights. Collision Avoidance Assist supports the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing the accident with a controlled evasive manoeuvre.

## Travel Assist

The Travel Assist system combines the functions of several assistants and ensures that you feel safe and comfortable, no matter where you drive. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel.

#### Door Opening Warning

When you stop your car and open the door (to get out), the system can detect other road users, such as vehicles, cyclists, runners, pedestrians, etc. up to a distance of 35 m. If it detects an approaching object, it warns the crew in the front and rear, both visually and audibly, about getting out of the vehicle.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

#### Trained Parking

A highly advanced parking assistant is used to automatically complete a parking manoeuvre in a familiar environment, e.g., at home. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to the garage or a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself. You simply monitor it from the driver's seat.

## Additional experts on board

To ensure that the car is ready to handle all situations that may occur on route, additional assistants with multiple functions are on hand to help or fill in for the driver.

#### Intelligent Park Assist (optional)

Let your car find and offer you parking spaces. Select one and then just sit back and watch. The Elroy will autonomously drive itself into the parking space, without driver having to touch the wheel or pedals.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

### Loft interior

Grey Recytitan pad with green stitching

Anthracite décor

Grey artificial leather/Recytitan upholstery with green stitching

### Design Selection Loft

The seat upholstery combines artificial leather with Recytitan recycled fabric in elegant grey colour with green stitching. It is tastefully complemented by the glossy anthracite décor and Recytitan dashboard and door pads in grey colour with green stitching.

# Sportline

## Dynamic style for every day

Efficient doesn't mean boring! The Elroq Sportline adds a spark of dynamics to the overall package, with blacked-out trim and side mirrors, unique badge, and specific wheels. The Sportline Design Selection is available for all battery versions.

### Style and functionality

The black glossy features, such as the exterior side-view mirror caps, side window frames, roof railings, and inscriptions on the tailgate bring more dynamism and emotion to the vehicle's appearance. The full LED Matrix

headlights and upgraded 20" Vega black alloy wheels come as standard. The look is completed by a black badge with Sportline lettering on the side.

## **Sporty elegance and comfort**

Dynamic looks, exclusive details, and quality materials are what makes the Sportline Design Selection unique. It includes front sports seats upholstered in Suedia artificial leather, leatherette dashboard pad with grey stitching, Carbon décor, and black headliner.

#### Sportline interior

# Accessories

## **Genuine Accessories that perfectly fit your car**

It's the finishing touches that make a car truly yours. Tailor your Elroq to your taste and needs with Škoda Genuine Accessories and enjoy a bespoke experience.

Enhance the looks with a choice of wheels and design details like mirror caps or specific door sills. Give the interior a more upscale look with premium carpets or make it more rugged with all-weather mats.

There are also other ways to make your life easier. A plethora of holders, hooks, charging cables and smart ideas like door-mounted bins and entertainment packages for rear passengers will make your travels a real joy.

The safety of you and your passengers, big and small, as well as your four-legged friends, is always our first priority. That's why we offer not only a comprehensive range of child seats, but also seatbelts for your dogs.

Anything you need to take with you will find its secure place in the boot thanks to various clever features and ideas.

Make your Elroq just perfect for you.

#### Towbar rack

5E3 071 105 | LHD, for 2 bicycles  
000 071 105P | LHD, for 3 bicycles

## Space for all you need

On some trips, even the largest boot is not enough for everything you need. Škoda Genuine Accessories has a solution. You can mount a bicycle rack to your tow bar or use various sizes of roof boxes to transport larger items.

#### Roof box\*\*

57H 071 200 | 512 l\*
