

# SKODA

The new  
**Enyaq**

## Discover the new electric Enyaq

The first Enyaq paved the way for Škoda's electric future. Now it drives into a new era combining a new, sleeker Modern Solid look with more efficient tech.

The most striking change is the new, sharp and stylish Tech Deck Face which replaces the more traditional grille of the previous generation. It is part of the new Modern Solid design language and it will be typical for the electric Škodas of the future. It is not all about looks though. The new Enyaq is one of the most aerodynamic Škoda cars ever, boasting an aerodynamic coefficient of 0.246. This is all combined with a battery line-up that goes up to 82 kWh, more than 530 km.

The interior elevates the tried and tested ergonomics of the previous version to another level. The focal point here is the Škoda infotainment system with 13" touchscreen, a new, smarter layout, and Virtual Cockpit, which comes as standard. To enhance comfort even further, the Enyaq RS includes features such as the augmented reality head-up display and Canton sound system.

The interior combines striking style with sustainability, using new and more eco-friendly materials.

With the new Enyaq, you can already drive and enjoy the future.

Note: Selection model shown here, not available in NZ.

Note: Selection model shown here, not available in NZ.

## Electrifying style

Škoda's electric pioneer steps into a new era, adopting the latest Modern Solid design language. The sleek and stylish Tech Deck Face replaces the traditional front grille and gives the car an unmistakably electric look. The dynamic elegance is further underscored by the front bumper on the Enyaq with a spoiler, aerodynamic side sills, and rear bumper with a diffuser.

### Tech Deck Face

The Tech Deck Face is a modern, glossy black interpretation of the traditional Škoda grille, which also houses functional elements like front radar. It is flanked by the angular, dynamic running lights, while the main headlights are mounted lower.

### Stylish rear

The new Modern Solid design language also comes with its own font, which is used for the Škoda lettering on the Enyaq's tailgate, replacing the traditional logo badge. The new font is also used for the model name and battery size on the lower part of the tailgate.

Note: Selection model shown here, not available in NZ.

#### Rear lights

The actively illuminated crystalline shapes turn the Enyaq's taillights into shining jewels. The stunning effect is emphasised by the animated turn signals and Welcome and Goodbye effects when approaching or leaving your car.

#### Two-level headlights

While the LED daytime running lights are part of the new Tech Deck Face, the main headlights are positioned lower. They are incorporated into the air curtain intakes, highlighting the combination of great, dynamic looks and more efficient aerodynamics than ever before.

Note: Selection model shown here, not available in NZ.

**Virtual Pedal**

Easy to open, even when your hands are full. The tailgate can be equipped with a Virtual Pedal which opens it with a simple kick under the bumper.

**KESSY**

Never leave your car unlocked again. The KESSY (Keyless Entry, Start and exit System) now not only lets you use all four doors to lock or unlock the car. With the Walk Away function, it also locks the car automatically as you leave its vicinity.

#### **Sustainable style**

The quiet speed of an electric vehicle is perfectly complemented by a refined and comfortable interior. With eco-friendly materials and contrasting stitching, driving sustainably can now be done in great style, too!

### Cockpit of the future

Everything important right in front of you. The 5.3" Virtual Cockpit is designed to display all the key information while keeping it clean and easy to digest. Besides standard driving data, you can highlight navigation, driving assists, or both. Everything can also be displayed on the augmented reality head-up display, like the "floating" navigation arrows.

## Enjoy full control

Everything you need to know, exactly where you need it. The combination of Virtual Cockpit, 13" infotainment display, and augmented reality head-up display allows information to be sorted by importance, so it's easy to focus on what's most important while still keeping track of everything else.

### Infotainment

The world at your fingertips. The new infotainment system now provides a more customisable experience and features an improved menu structure, three basic buttons for easy access, and redesigned navigation. The 13" touchscreen remains and still offers sharp looks and smooth performance.

### Electric seats

Perfectly tailored comfort for all. Electric adjustment makes it easy to find the seating position that is perfect for you, while the carefully designed shape offers ample lateral support while still retaining a cushy and comfortable feel.

### The new steering wheel

The Modern Solid Škoda lettering on the centre is the new focal point of the Enyaq's steering wheel. It is multifunctional and comes with leather upholstery as standard.

### Always charged

The phone box provides wireless 15 watt charging for your smartphone with cooling to prevent your device from overheating. This compartment is easily accessible and offers space for a second smartphone beside the one being charged.

### Jumbo Box and centre console

Electronic devices can be safely stored in the Jumbo Box in the front armrest, while small items can be placed in a removable tray. And when the air conditioning is on, you can even cool your snacks. There are also two easy-open cupholders.

#### Connectivity

The new Enyaq comes with wireless Apple CarPlay and Android Auto, so you can safely and easily use selected smartphone apps on the infotainment screen.

### **Panoramic roof**

Enjoy the view of the skies. The optional panoramic roof offers not only great views, but also lets more light into the cabin, making it feel much more airy.

## **Smart ideas for every day**

Every day can be made better with smart ideas. The Enyaq offers a long list of ingenious details that will surprise you and make your life on the road that much easier.

### **Rear seats**

Your passengers in the rear can also enjoy the true comfort of the Enyaq. Ample room is standard, with the option to upgrade to heated outer seats and leather upholstery for maximum comfort. For little passengers, there are Isofix mounting points on the outer seats.

**Boot space**

In its standard configuration, the Enyaq offers 585 litres of cargo space. If you need even more space, you can increase the useable volume to 1,711 litres by folding down the rear seats. And it is not just about space – with its various smart features and compartments, the Enyaq takes the ease of transporting both small and large things to another level.

**Net programme**

Keep your cargo neatly organised with the help of the net programme. A set of elastic nets on the bottom and the sides of the boot, as well as on the rear seat backs, will keep your luggage and other cargo safely in place. This means you will always find what you are looking for and nothing gets damaged from moving about.

### Turn Assist and Collision Avoidance Assist

Turn Assist monitors opposing traffic when turning right at low speeds between 2–15 km/h. In critical situations, it can stop the vehicle and turn on the warning lights. Collision Avoidance Assist supports the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing the accident with a controlled evasive manoeuvre.

## Travel Assists

The Travel Assist system as well as its higher version combine the functions of several assistants and ensure that you feel safe and comfortable, no matter where you drive. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel.

### Door Opening Warning

When you stop your car and open the door (to get out), the system can detect other road users, such as vehicles, cyclists, runners, pedestrians, etc. up to a distance of 35 m. If it detects an approaching object, it warns the crew in the front and rear, both visually and audibly, about getting out of the vehicle.

### Intelligent Park Assist (optional)

Let your car find and offer you parking spaces. Select one and then just sit back and watch. The Enyaq will autonomously drive itself into the parking space, without the driver having to touch the wheel or pedals.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Sportline

## Energise your drive

Do you want an efficient and eco-friendly car, or a fun one? Have both! The Enyaq Sportline adds sporty style to its looks with blacked-out trim and side mirrors, unique badge, and specific wheels. The Sportline Design Selection is available with the 82 kW battery.

### Style and functionality

The most typical attributes of the Enyaq Sportline are the black glossy features, such as the exterior rear-view mirror caps, side window frames, roof rails, and Škoda lettering on the tailgate. Together, they bring more

dynamism and emotion to the vehicle's appearance. The full LED Matrix headlights and Vega 20" alloy wheels come as standard. The final touch is the black Sportline badge on the tailgate.

#### Comfortably zoomed

Fancy more dynamism and exclusivity in your everyday commute? The Sportline interior comes with black artificial leather and Suedia upholstery with grey stitching. The Carbon décor brings the whole effect over the finishing line.

### **Sportline interior**

Leatherette pad with grey stitching  
Carbon décor  
Suedia/leatherette upholstery with grey stitching

### **Design Selection Sportline**

For a more dynamic feel, the Sportline Design Selection combines leather and Suedia upholstery with contrasting grey stitching and adds Carbon décor as a final sporty touch. The dashboard and door pads combines leatherette with contrasting stitching.

RS

## A quiet way to be quick

With its 250 kW of instant electric power, 4x4 drive, and sports chassis providing impeccable grip, the Škoda Enyaq RS offers impressive performance in an efficient, eco-friendly way. With the huge space inside, the thrill of speed can be enjoyed by the whole family.

### A sporty drive deserves a sporty look

In both body styles, the new Enyaq RS is easily recognisable by its unique RS bumpers and air curtains, as well as the stunning Tech Deck Face with Light Band. The glossy black elements such as the side mirrors, roof railings,

and window trim add to its visual dynamism. The stunning look is finished off with a set of 21" Vision wheels with Aero covers.

### RS badge

As a nod to the famous racing tradition of Škoda cars, the sporty RS badge is included on the sides.

### The office of speed

Charge your daily commute with a dynamic style and exclusive materials. The RS interior comes with a combination of artificial leather and Suedia upholstery with lime stitching. The Carbon décor is a perfect finishing touch for the whole sporty look.

### RS Lounge interior

Suedia pad with lime stitching  
Carbon décor  
Suedia/leatherette upholstery with lime stitching

### Design Selection RS Lounge

For a sporty yet exclusive style, RS Lounge combines leather and Suedia upholstery with contrasting lime stitching, plus Carbon décor as a dynamic finishing touch. The dashboard and door pads combine Suedia with lime stitching.

#### RS Suite interior (optional)

Black artificial leather pad with textured finish  
Carbon décor  
Embossed leather with grey piping

#### Design Selection RS Suite (optional)

RS Suite offers a dynamic look with added premium style. The leather upholstery is highlighted with stylish grey piping, while the black artificial leather with textured finish on the dashboard pad and doors elevates the upscale look even further. The Carbon décor adds a final touch of sportiness.

## Accessories

## Genuine Accessories that perfectly fit your car

Just like perfectly tailored clothes, the Enyaq needs a few finishing touches to make it truly yours. Fine-tune your Enyaq to your exact taste and needs with Škoda Genuine Accessories and enjoy a one-of-a-kind experience.

Enhance the looks with a choice of wheels and design details like mirror caps or specific door sills. Give the interior a more upscale look with premium carpets or make it more rugged with all-weather mats.

There are also other ways to make your life easier. A plethora of holders, hooks, charging cables, and smart ideas like door-mounted bins and entertainment packages for rear passengers will make your travels a real joy.

The safety of you and your passengers, big and small, as well as your four-legged friends, is always our first priority. That's why we offer not only a comprehensive range of child seats, but also seatbelts for your dogs.

Anything you need to take with you will find its secure place in the boot thanks to various clever features and ideas.

Make your Enyaq just perfect for you.

Further specifications

Body		Front brakes	Internally cooled disc brakes, single piston for the 60; two-piston for the 85, 85x and RS
Type	5-seater, 5-door, 2-compartment	Rear brakes	Drum brakes
Chassis		Clearance (mm)	183 (for the 60); 186 (for the 85); 181 (for the 85x); 167 (for the RS)
Front axle	McPherson suspension with a sheet metal subframe and lower wishbones	Luggage storage space (max. l)	
Rear axle	Multilink axle, with five transverse arms, without a longitudinal arm	Without spare tyre, with rear seat backrests – upright/down	585/1,710

The maximum power is determined in accordance with UN-GTR.21. The maximum power is available when the high-voltage battery is at its highest possible state of charge (SoC) and operating within its optimal temperature range. The power available varies according to the driving scenario and is influenced by factors including the battery’s temperature, its SoC, and the physical ageing of the high-voltage battery.

WLTP – World harmonized light-duty vehicles test procedure.
