

SKODA

The new
Kamiq

Explore your many sides

Exploring is part of who we are. From everyday discoveries to great voyages, you need a bold companion to explore the world. To explore yourself. Someone like the new Škoda Kamiq.

With the Kamiq, the go-anywhere capabilities of the small SUV are packaged in a playfully creative design. Inside, it is as attractive and functional as ever with a long list of comfort, connectivity and safety features. Life is made easier with touches of everyday magic like the LED headlights, Climatronic panel, Virtual Pedal and an immersive infotainment display.

That's the smart way to explore. That's what we call Škoda.

The spring summer autumn winter collection

Bold style for the everyday explorer. The proportions of an SUV and the perfect size for the city. The Kamiq blends everything you need for your normal day with capabilities that come in handy when you set off on an adventure. With the new look, you will always be the focus of attention.

Explore beauty from every angle

The attractive new look starts in the front, with the wider grille, sharper headlights and distinctive new bumper. Together, they give the new Kamiq a more solid, dynamic style. Driving away, the rear bumper with integrated diffuser and restyled rear lights will catch your attention. A family explorer with striking looks.

Panoramic roof

On the outside, the panoramic roof (available in the Monte Carlo) underscores the sleek, stylish look. On the inside, it brightens the interior and opens the view of the sky above.

Unmistakable shape

Together with rear reflectors, the taillights create the characteristic C-shape, making the Kamiq easily identifiable at the first look. The revamped rear bumper with Platin Grey integrated rear diffuser adds to the bold style.

Turn on the light show

Matrix headlights

They catch the eye and help you see. The three-dimensional design with crystal structure is one of the most prominent visual features of the car, while the advanced LED Matrix technology that comes standard in the Monte Carlo, improves visibility for the driver.

Dynamic rear lights

Helping you be seen with the bright LED light and immersive design. The crystalline elements and dynamic turn signal function of the LED rear lights will attract the attention of everyone behind you.

Virtual Pedal

Full hands are not a problem anymore. With Virtual Pedal, just a swing of the foot under the bumper is enough to open the door. Standard in Monte Carlo, and available in combination with KESSY and electric 5th door.

KESSY

No more hassle looking for your keys. With the Keyless Entry, Start, and Exit System, the doors unlock or lock again with just a touch of the door handle. You just need to have the key in your pocket.

Exploration begins within

Family friendly, yet also driver focused and stylish. The new interior's dominant features include the 10" Virtual Cockpit and the 9" Škoda Navigation in the middle of the dashboard. The dashboard also boasts a choice of new upholstered décors made of Suedia or the new Carbon look. These are matched by the redesigned seat upholstery for both trim levels. The new ambient lightning with two switchable colours sets off the atmosphere with a finishing touch.

Climatronic

Maintaining a pleasant climate on board is now easier than ever. The Climatronic air-conditioning system is fitted with a pair of buttons that allow you to adjust the air flow without taking your eyes off the road.

Fulfilment is just a tap away

In today's digital world, you need your everyday companion to take care of your digital needs as well. Whether it's charging your devices or providing you with the most up-to-date information on a large screen, the Kamiq has a solution.

Always charged

With a pair of USB-C ports in the front, you can keep your devices charged at all times with ease.

SmartLink

SmartLink provides you with a connection between your smartphone and the in-built infotainment via Apple CarPlay or Android Auto. Play music, navigate, deal with your text messages and calls, or listen to your favourite podcast.

Net programme

Everything in its place and easy to see. This set of three nets keeps your items from moving around while keeping them in good view.

Treat your things like passengers

Wherever your exploring takes you, it's always good to have space for everything. Even better to have things well-organised and secured safely. With 400 litres of luggage space and various clever details and storage spaces, you'll never have to leave anything behind.

Net pocket

Lighter items that need to be on hand even when the boot is full can be stored in the practical net, out of sight under the luggage room cover.

Hooks in the boot

The great variability and use of the Kamiq's boot also benefits from two sturdy hooks on the sides. They are designed to hang items or baggage which would otherwise be unstable or would not fit on the boot floor..

Adaptive Cruise Control

Using a radar device in the front grille, in addition to its basic cruise control function, this assistant system maintains a safe distance from vehicles in front of you, controlling the engine and actuating the brakes to automatically accelerate or decelerate as needed. The system increases driver comfort and driver safety while also reducing fuel consumption and CO2 emissions.

Additional experts on board

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver..

Lane Assist

Lane assist recognises an unintentional departure from the lane, providing a visual message, and initiates corrective steering. It is activated at speeds above 65 km/h provided that there are recognisable lane markings on the road surface and the turn signal has not been turned on.

Side Assist

Using radar sensors in the rear bumper, Side Assist (which can detect other vehicles and harder to see objects like cyclists up to 70 m away) monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

Crew Protect Assist

This assistance system provides increased protection for front-seat passengers in critical situations that could lead to a crash by closing the side windows to leave only a 5 cm gap, shutting the roof window, and tightening seatbelts. The new state-of-the-art version of the system can use radar sensors both in front and in the rear.

Front Assist

The Front Assist system, using a radar device in the front grille, is designed to monitor the distance from the vehicle ahead, including emergency braking function. The system also includes predictive pedestrian protection, which warns the driver via an audio/visual signal as well as a gentle jolt of the brakes.

Matrix Beam Function

The LED Matrix headlights available in the Monte Carlo, feature Matrix Beam Function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the Matrix Beam Function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate the road. The Matrix Beam Function also uses information from the navigation system. Thanks to it, the high beams will only turn on when you are out of a built-up area.

Monte Carlo

Our sporty legacy, now yours

In the true spirit of Škoda's rallying legacy, the Kamiq Monte Carlo is ready to take you through the wintry mountains as well as into the glamorous city streets. A sporty style for a night on the town or a weekend out of it.

A champion on every road

Joyful and functional. The unmistakable looks start with the aerodynamic front bumper with integrated spoiler, further enhanced with the gloss black details. The LED Matrix headlights come as standard so you can see and be noticed.

The gloss black diffuser in the back highlights the bold shape of the rear bumper and underscores the sporty flair of the Kamiq Monte Carlo. The drivers behind you will also notice the cool gloss black lettering.

Treat the extrovert within you

The dynamic features of the Monte Carlo interior empower you to enjoy driving even more. The design and the materials are there to bring a touch of magic to the everyday. The Carbon look dashboard pad and Carbon door inserts create an attractive, modern style, highlighted by the typical red accents on the upholstery. The multifunction sport steering wheel in perforated leather, sports pedal covers and black headliner create a dynamic atmosphere to amplify your driving fun. The rich feature list, including Climatronic climate control, 8-speaker stereo and switchable ambient lighting is there for comfort, while the Drive Mode Select allows the driver to choose between the dynamic or cossetting style of the Kamiq's character.

Follow your instinct, not their expectations

The Monte Carlo creates a sportier ambience without compromising on comfort or practicality. It comes with sports seats, sports steering wheel, Carbon look dash pad and door inserts and two-colour ambient lighting.

Focused on the driver

The multifunctional sports steering wheel is upholstered with perforated leather for even better grip and Monte Carlo badge for added style. The standard 9" Digital Display can be switched into sports mode.

Sports seats

The Monte Carlo seats will catch your attention with their sporty red and grey accents. They provide great lateral support for dynamic driving and plenty of comfort for your everyday commute.

Trims

Lodge interior

Grey Suedia pad with copper décor
Grey Suedia/black fabric upholstery
