

# THE NEW ŠKODA KAMIQ SCOUTLINE

**ŠKODA**  
SIMPLY CLEVER

A blue Skoda KAMIQ SCOUTLINE is driving on a winding asphalt road that curves through a mountainous landscape. The car is in the lower-left foreground, moving towards the viewer. The road has white lane markings and a guardrail on the right side. In the background, there are rolling hills, a small town nestled in a valley, and a bright sunset sky with the sun low on the horizon to the right. The overall scene conveys a sense of adventure and freedom.

# FOR THE HINT OF OFF-ROAD IN EVERY ROAD

If your comfort zone begins outside of your comfort zone, the KAMIQ SCOUTLINE is the car that fits you. Whether you are heading for the great outdoors or the great indoors, this urban crossover with an SUV spirit will make sure you get there comfortably, and in style.

Its higher chassis of 188 mm and protective exterior elements make sure that you feel safe on every road. So, if you want to give an extra flavour to your vanilla routes, this car is the perfect fit.

That's Simply Clever. That's ŠKODA.

# A CLEAN DESIGN, EVEN WHEN IT GETS DIRTY

If the KAMIQ's elegant lines and dynamic shape unite in harmony, then the black and silver protective exterior elements of the SCOUTLINE version give it a bit of edge. Just like that feeling you get when you leave your comfort zone to discover something new.

## FRONT VIEW

While the split headlamps are a nod to the KAMIQ's distinctive design, the robust front bumper with add-on part in silver emphasises the SCOUTLINE version's off-road charisma. The car can be equipped with full LED headlamps including corner function, fog lamps and animated turn indicator.

## REAR VIEW

The add-on part on the rear bumper with integrated diffuser in silver, accentuating the generous clearance, gives the car rear an exceptionally robust appearance. The LED rear lights including animated turn indicator come as standard.

## HARD SHELL, COMFORTABLE CORE

Don't let the vigorous body confuse you, as it hides a gentle soul. Get ready to be pampered once you close the door behind you and relish the surprising roominess, state-of-the-art technologies and high-quality materials that look as good as they feel.

## INTERIOR DESIGN

The car features specific upholstery in a combination of fabric and Suedia and décor in SCOUTLINE design. The lighting package, which makes your space cosier and more comfortable, includes LED ambient lighting running along the dashboard (in white or copper), door handle lighting and LED reading lights, for example. The black ceiling is optional.

## LEATHER DETAILS

Your feeling of comfort is enhanced by the leather steering wheel, gear stick knob and handbrake handle.

## PEDAL COVERS

Sport pedal covers in alloy design represent both a stylish and comfortable detail.

#### **SCOUTLINE LOGO**

The original logo on the sides of the car shows not only the individuality of the SCOUTLINE version, but also our desire to offer you variable solutions within each model line. This gives you the opportunity to choose a version of the car that will fit you.

#### DOOR EDGE PROTECTION\*

When opening all side doors, plastic strips eject and cover the edges. In this way, the KAMIQ SCOUTLINE protects itself against damage as well as being considerate to other cars. Perfect for tight parking spaces, for instance.

\*Optional feature

#### ROOF RAILINGS

The practical roof railings in attractive silver are a perfect match for the silver strips around the side windows and for the side-view mirror caps in silver (not shown).

#### DOOR SILL STRIPS

The decorative door sill strips in the front carry an original KAMIQ inscription.

# CONNECTIVITY FOR A PERFECT TRIP

Make your life easier with new-generation connectivity thanks to features including a touchscreen infotainment system and connection between your smartphone and the car via SmartLink.

## SMARTLINK

With the SmartLink system (ŠKODA Connectivity bundle supporting MirrorLink®, Apple CarPlay, Android Auto) the car's infotainment system enables the driver to safely use the phone while driving. Plus, all installed applications that are certified as safe for vehicles are compatible with MirrorLink®, Apple CarPlay or Android Auto. The latter two are also available wirelessly.

# TRAVEL ASSIST\*

The optional Travel Assist combines Adaptive Cruise Control (including Front Assist) and Adaptive Lane Assist functions. For maximum safety, it must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel. Travel Assist comes exclusively in combination with the Virtual Cockpit and the optional Amundsen infotainment system.

## ADAPTIVE CRUISE CONTROL\*

Using a radar device in the front grille, in addition to its basic cruise control function, this assistant system, which operates up to speeds of 210 km/h, maintains a safe distance from vehicles in front of you.

\*Optional feature

## ADAPTIVE LANE ASSIST

The system is capable of keeping the car in the middle of the correct lane and of alerting the driver in case of deviation. It can also take control of the car in the event of lane changes during roadworks.

## FRONT ASSIST

The Front Assist system, using a radar device in the front grille, is designed to monitor the distance from the vehicle ahead, including emergency braking function. The system also includes predictive pedestrian protection, which warns the driver via an audio/visual signal as well as a gentle jolt of the brakes.

# ADDITIONAL EXPERTS ON BOARD

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

## PARK ASSIST\*

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place and safely parks in a row of parallel or perpendicularly parked vehicles.

\*Optional feature

## MANOEUVRE ASSIST

Using the parking sensors, this system offers protection from obstacles within driving distance of the car (at speeds of up to 8 km/h). If an obstacle is detected, based on the distance from the obstacle and the car's speed, the system engages the emergency brakes.
