

SKODA

Karoq

Take it easy, take it anywhere

Every journey can be the beginning of something. A valuable experience, a happy coincidence or a shared memory. And with the versatile Škoda Karoq, you can make those journeys comfortably. With its unmissable SUV styling, the Karoq is as practical as it is head-turning. Its compact proportions are underlined by a distinctive front grille and all-round protective elements. LED illumination and eye-catching alloy wheels complete the impressive exterior.

Step inside, and you'll be welcomed by customary Škoda offerings like spaciousness, all-you-can-have connectivity features and reassuring assistance systems. And for those of you looking for more adventurous detours, the Karoq also comes with an optional 4×4 drive.

Exterior Design

A landmark on any road

With its robust body with protective features and higher ground clearance, the Karoq invites you to venture off the beaten track. At the same time, its compact dimensions, sleek lines, and stylish wheels accentuate the car's ambition to be a great urban SUV.

Style and functionality

The car's front features newly designed elements, such as the grille, headlights, bumper with a spoiler, and more. You'll also find air curtains in the front bumper, designed to reduce the air resistance, which streamline airflow around the front wheels and the body sides.

Top full LED tail lights

The tail lights, supplied in two versions, have also been innovated both in terms of shape and technology. Fitted with animated turn indicators, they significantly improve the visibility of your car for other drivers. In addition (depending on surrounding light intensity), when you lock and unlock your car, the welcome effect activates the animation feature.

Full LED Matrix headlights

The newly shaped Karoq headlights are available in two types in terms of functionality. Equipped with LED lights, both types offer high performance and high energy efficiency. The top-end option comes with full LED Matrix headlights, giving the driver maximum light power without dazzling other road users.

SUV signature

The new Karoq evokes a sense of strength and security greatly enhanced with a newly shaped robust rear bumper with black diffuser. Depending on the car version, the new Karoq can also feature an extended roof spoiler which underlines the car's distinctive appearance while improving its aerodynamics. With its higher ground clearance, the vehicle can travel off the tarmac regardless of the type of drive selected. If you are looking for the best possible off-road capability, we recommend the 4×4 Sportline version.

Interior Design

Spend hours in one place

Inside the car, spaciousness meets sophisticated style and modern technology. The interior boasts new upholstery and décor options, alongside practical equipment to increase your comfort and safety.

10" Virtual Cockpit

The Virtual Cockpit that comes standard in the Karoq Sportline, displays onboard computer specifications in combination with other information, such as navigation. You can choose from five layouts (Classic view shown) controlled via the View button on the steering wheel.

8" Digital dash

The new Karoq features a digital dash with clearly readable graphics, which takes all the information you need and puts it where you need it most – in your field of vision.

Glove compartment

The closed storage compartment is located in the lower part of the dashboard by the front passenger.

Škoda's little helpers

Driver's storage box

The driver can utilise a practical tilting storage compartment located directly below the steering wheel.

Life is easier when the equipment is practical. The new Karoq offers plenty of smart storage space and other helpful details that make everyday journeys more enjoyable.

Phone box

The phone box in the new Karoq has two USB-C data ports that allow you to easily connect and pair your external devices with the infotainment system. Additionally, you can wirelessly connect to the system for added convenience. The top-end option also wirelessly charges your device while driving.

Liquid reservoir

You will never spill a single drop when refilling the washer fluid. The liquid reservoir is not only easily accessible but also has an integrated funnel.

Reflective vests / Rubber strap

The optional reflective vests can be stored in the compartments in the front and rear doors, ensuring they are always within reach. In the front compartments, the items can also be fastened with a rubber strap.

Comfort
And Space

Comfort is your co-driver

Indulge yourself even when driving. Modern technologies, remarkable roominess, and a host of practical details will turn your everyday journey into a luxury trip.

KESY

You will quickly get used to the convenience of KESY (the Keyless Entry, Start and exit System), which allows you to lock/unlock your car and start the ignition/switch off the engine without inserting the key.

Welcome logo

The LEDs on the front doors' underside, projecting the Škoda inscription, illuminate the entry area.

Jumbo box

The spacious Jumbo box storage compartment is housed in the front armrest. You can, for example, store your electronic items safely inside. The Jumbo box can also be equipped with a coin holder and two drink holders with Easy Open function.

Adaptive Cruise Control

The driver's comfort during long motorway journeys is enhanced by the Adaptive Cruise Control, which operates up to speeds of 210 km/h.

Foldable tables

The comfort of the passengers in the rear seats can be increased with the addition of optional foldable tables, these can be built into the backrests of both front seats.

Rear armrest

When the middle rear seat is not occupied, the armrest with drink holders can be folded down.

VarioFlex options

To enlarge the luggage area, you can tilt all the rear seats towards the front seats (see the left seat). This position also allows you to remove them easily. This can be done single-handedly and does not require the use of any tools.

Fold it. Move it. Remove it

The VarioFlex rear seating system allows you to customise the interior according to your current situation. It is comprised of three separate rear seats. You can fold each one down independently, as well as remove them completely.

VarioFlex – all seats folded down

The luggage compartment, with a basic volume of 588 litres, can be extended up to 1,605 litres by folding the rear seat backrests down.

VarioFlex – all seats removed

If you completely remove the rear seats, you gain a luggage area with a capacity of 1,810 litres.

Net programme

These optional practical nets reliably prevent your things from moving around. Plus, you can clearly see where you have put everything.

Double-sided carpet

You can use the carpet with the elegant fabric side up when not transporting anything that might make dirty, and easily turn it over to utilise the washable rubber side when required, with the optional double-sided carpet.

Safety

Crew Protect Assist

This assistance system provides increased protection for front-seat passengers in critical situations that could lead to a crash by closing the side windows to leave only a 5 cm gap, shutting the roof window, and tightening seatbelts. The new state-of-the-art version of the system can use radar sensors both in front and in the rear.

Front Assist with predictive pedestrian protection

The Front Assist system, using a radar device in the front grille, is designed to monitor the distance from the vehicle ahead, including emergency braking function. The system also includes predictive pedestrian protection, which warns the driver via an audio/visual signal as well as a gentle jolt of the brakes.

Additional experts on board

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Matrix Beam Function

The full LED Matrix headlights feature Matrix Beam Function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the Matrix Beam Function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate

the road. In addition, thanks to this function, you are not blinded by reflective materials on traffic signs, for example. The Matrix Beam Function also uses information from the navigation system, so the high beams will only turn on when you are out of a built-up area.

Lane Assist

Lane assist can tell you when you stray from the lane unintentionally. The lane assist system works in conjunction with a multipurpose camera to recognise lane markings on the road, including yellow lines during roadworks, traffic cones and other roadside or lane boarders.

Side Assist blind spot information

Thanks to two radar sensors at the rear of the car, the Side Assist detects vehicles approaching from behind or that are in the car's blind spot. The driver is informed of this using an LED signal on the inside of the wing mirror housings.

Driver Alert

Driver alert reduces the risk of fatigue-induced emergency. By monitoring driver behaviour, the system assesses the degree of driver fatigue and, if necessary, warns of the need for a rest and break in the journey.

Sportline

For the sport called life

They say there is no rest for the restless. But the new Škoda Karoq Sportline is certainly a comfortable way to unleash your active ambitions. With a 2.0 TSI/140 kW 4×4 engine, driving to your favourite outdoor activity will be as exhilarating as the sport itself.

Style and functionality

The bumpers in the Sportline design are accompanied by black exterior elements, such as front grille frame, external side-view mirror caps, window frames, and roof railings. The dynamic appearance of the car is further enhanced by

the extended roof spoiler, inscriptions in black on the 5th door (such as Škoda, the model name, or 4×4), black rear diffuser, and 19" anthracite alloy wheels. In addition, the full LED Matrix headlights come as standard.

Sport mode is always on

The dynamic exterior is perfectly matched by an equally impressive black interior that combines sporty style and elegance. It includes, among other things, front sports seats, a sports steering wheel with Sportline plaquette, upholstery with ThermoFlux function, distinctive décor, LED ambient lighting, and much more.

Front sports seats

The front sports seats provide maximum comfort even during a dynamic drive. Thanks to the specific fabric upholstery with ThermoFlux function, which ensures more breathability, the passengers can enjoy maximum comfort in all climatic conditions.

Sports steering wheel

Your driving pleasure is enhanced by the multifunction 3-spoke sports steering wheel in perforated leather, with an original Sportline plaque. The Virtual Cockpit, which displays onboard computer specifications in combination with other information, offers five layouts with specific

graphics controlled via the View button on the steering wheel. In addition, the Sportline features special graphics for Sport View (shown).
