Octavia iV

## Power up your possibilities

iV – that's the badge we at Škoda give our most innovative cars. It also means developing vehicles that are more intelligent, individual and intuitive.

That's what the Škoda Octavia iV stands for. It offers the dynamism and efficiency of an electric engine for day to day urban driving and a 1.4 TSI engine for any trips outside the city. Don't make a compromise between performance and sustainability. Just enjoy the best of both worlds. The Octavia iV is here for anyone who wants to live fully now, yet look to the future.

## Innovative from the inside out

### Engines

The 1.4 TSI petrol engine offers 110 kW, the electric motor generates 85 kW and the full system power is 150 kW. For your maximum driving comfort there is an automatic 6-speed DSG. During a purely electrical drive, the eSound acoustic system is activated, alerting pedestrians that a car is coming. The system operates both when driving forward (at speeds of up to 25 km/h) and when reversing (up to 10 km/h).

### Battery and charging

The battery with a capacity of 13 kWh is located under the floor in the back of the car and powers you up to an approximate 60 km drive. When charging at home and connected to a conventional electrical grid, the battery (if completely empty) will be fully recharged within approximately seven hours.

### Infotainment

The 10" Infotainment (Columbus navigation system shown) allows you to check the battery status, set up a purely electrical drive, or choose a drive with full system power, for example.

#### **Charging cable compartment**

No need to think about where to store the charging cables. The charging cable compartment in the boot of the car provides plenty of room for both the fast charging cable and home charging cable..

#### **Luggage compartment**

Although the Octavia iV is equipped with other technical features compared to the basic model, it offers plenty of space for your luggage thanks to its sophisticated interior concept.

## Find inner balance

The Octavia iV embodies your idea of comfort, whichever it is. The car can satisfy even the most diverse demands on exterior appearance, interior equipment, technology and connectivity, available in Style and even in a unique RS version. Choose the one that fits you and relax into your seat.

### Style black interior
