

SKODA

Scala

A brave new world

the Škoda Scala is a bold step forward for the brand. Its sophisticated shapes create a striking play of light and shadow that blend timeless design with sporty character. Its dynamic silhouette is embraced by a practical spirit that makes the car the perfect partner for every stage of life.

The Scala also offers abundant technologies uncommon in the compact hatchback segment. Advanced assistance systems and a new generation of infotainment mean you can stay safe without compromising on fun, on every journey.

Exterior Design

Aerodynamics

Every edge, contour and dimension of the car has been created to optimise aerodynamics. A desirable balance between its width and height projects safety and reliability.

Give the everyday a sporty jacket

Good design agrees with the heart and the head. Like in the Scala. This compact hatchback with a sporty spirit represents the dynamic and emotional side of Škoda's design language, while offering excellent aerodynamic driving properties.

Black features

To add a more sporty and individual signature to daily driving, the Scala can be enhanced with the optional black panoramic roof, roof spoiler, glass extended over the 5th door and attractive 18" Vega Aero alloy wheels.

Remain in the spotlight

Light doesn't just illuminate. It inspires. The unique headlights and slim long tail lights make the car instantly recognisable. The crystalline light design with integrated LEDs represents a perfect blend of Czech crystal tradition and modern technology.

LED headlights

The Scala is all about LED technology, with standard-fit LED headlights, including corner function. The strip of LEDs for daylight driving positioned at the upper part of the headlight lends the car its sporty charisma.

Full LED tail lights

The Scala features horizontally designed tail lights where the original light signature is accompanied by perfect functionality. The top-end option comes with the full LED tail lights, which are fitted with animated turn indicators.

Interior Design

Style and functionality

The Scala's interior is furnished with quality materials and great craftsmanship. Multiple combinations of upholstery and decor mean you can give your car a unique personality. Attractive design is also accompanied by perfect functionality. The dashboard as well as panels in the door have a special soft surface resembling crystalline structures. This unique detail can prevent objects from slipping and in the future will become a typical Škoda feature.

It's what's on the inside that counts

Virtual cockpit

The optional virtual cockpit displays on-board computer specifications in combination with other information such as navigation. You can choose from five layouts (extended view shown) controlled via the 'View' button on the steering wheel. The Scala's virtual cockpit features a 10.25" display.

Stepping inside the Scala is equally impressive. The well-appointed interior radiates with sleek design cues, exceptional spaciousness and cutting-edge digital technology.

Ambient lighting

Make your space more cosy and comfortable with LED ambient lights running along the dashboard. Your car can be equipped with white, red or orange lighting.

Connectivity

Connectivity options

Discover additional options and features. For example, with Laura, a digital voice assistant is available in your car. With the SmartLink feature, supporting Apple CarPlay and Android Auto, the car's infotainment system allows you to use your phone safely while driving.

*Optional infotainment system shown.

Laura digital voice assistant

The Laura voice control system understands fluent sentences. Say the destination with natural voice input, dictate text messages, or even ask her to tell you a joke. To start fulfilling your wishes, simply contact her by saying "Okay, Laura!"

SmartLink+

With the SmartLink system, which integrates Apple CarPlay, Android Auto and MirrorLink®, the car's infotainment system lets you use the phone safely while driving. After making a connection, you can handle calls and messages, listen to music or use the navigation via the infotainment system.

Smart
features

Umbrella storage compartment

An ingenious compartment is fitted inside the driver's door. It is designed to let water drain away from the car, keeping the interior dry..

The car with an IQ

The Scala is equipped with a range of Simply Clever details that can handle all your needs. From loading your luggage to adjusting the interior space to find room for big and small things, these thoughtful features take the headache out of travelling.

Electrically-controlled 5th door (optional)

It opens and closes at the mere touch of a button on the remote control or in the driver's door, especially handy in unfavourable weather. You can also adjust the upper door position to suit your needs. A button for closing the 5th door is also located on the door itself.

Double floor (optional)

The optional double floor places the bottom of the luggage compartment on the loading edge level, facilitating easier luggage handling. In addition, it provides a discrete storage place.

Liquid reservoir

You will never spill a single drop when refilling the washer fluid. The liquid reservoir is not only easily accessible, but also has an integrated funnel.

Ice scraper

The ice scraper, which is mounted on the fuel cap, can also be used to measure the depth of the tyre tread.

Double-sided carpet (optional)

You can use the carpet with the elegant fabric side up when not transporting anything that might make your car dirty, and can easily turn it over to utilise the washable rubber side when required.

Don't pack light

Don't think twice about what to take or not. The generous luggage compartment capacity of 467 litres, and 1,410 litres after folding down the rear seats, puts this car at the top of its class. In addition there are many options for ensuring your stuff stays in its place, without damaging the car.

Net programme

One horizontal and two vertical nets increase the flexibility of the luggage space while firmly securing objects.

Net under the cover

This net under the luggage compartment cover can serve as a safe storage place for items that you would like to transport separately from other objects.

Safety

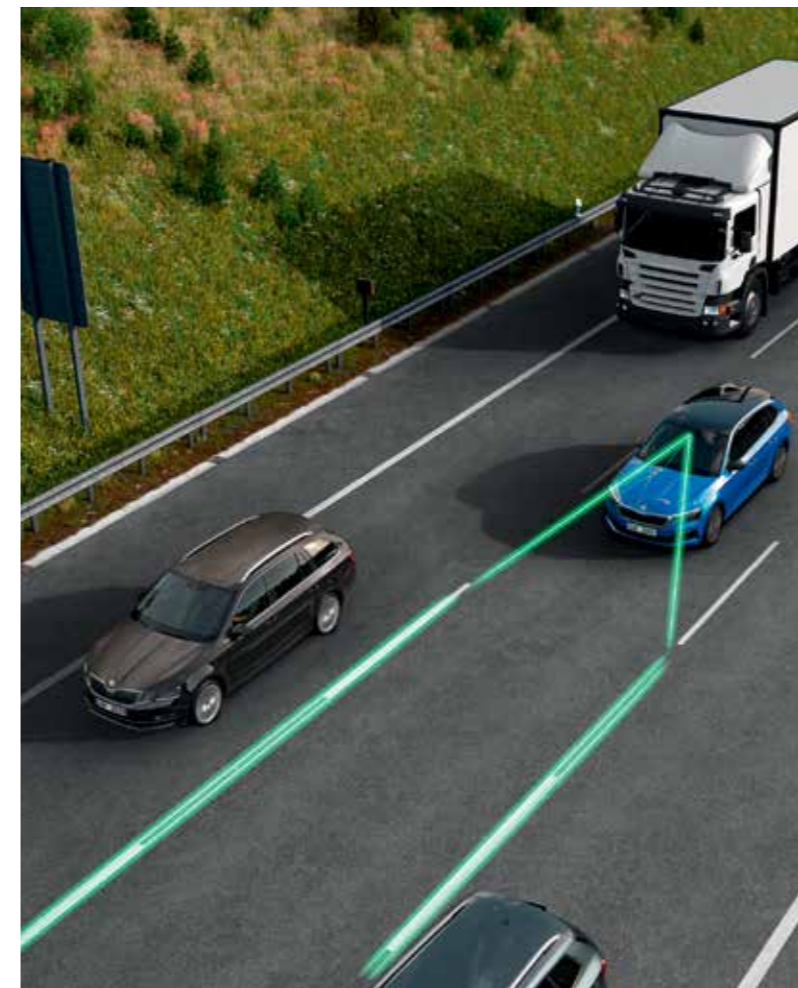

Cruise Control + Speedlimiter

Cruise control helps the driver to maintain the set speed without having to press the accelerator pedal.

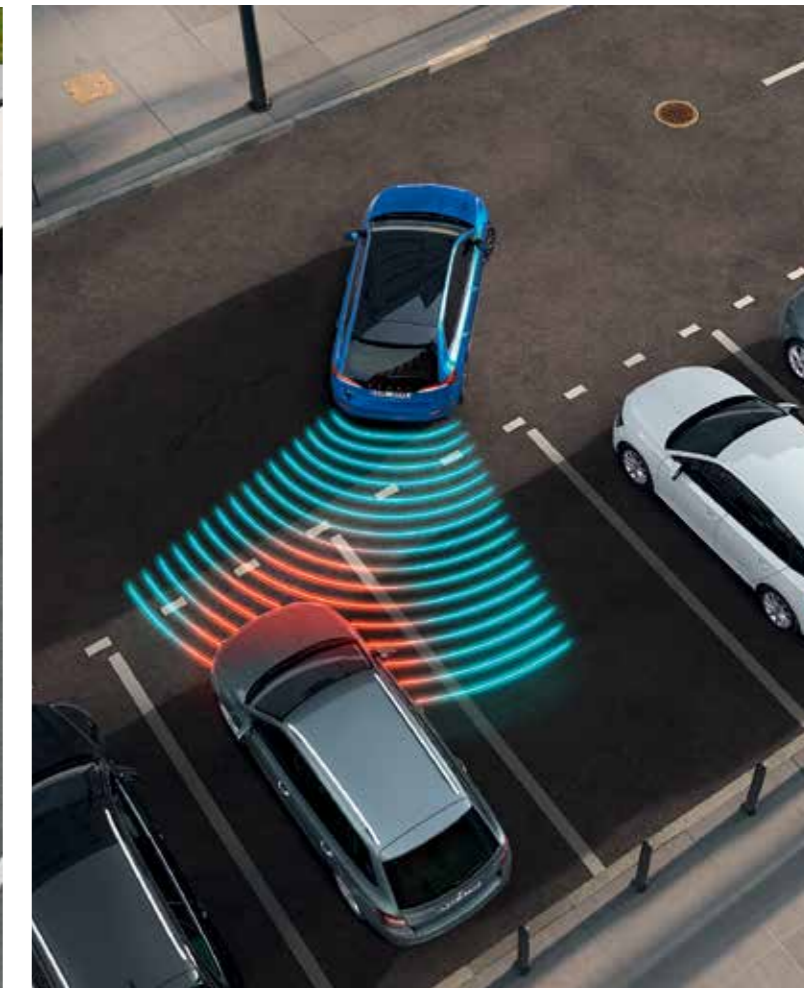

We'll watch your back

Embark on any adventure with complete confidence. The Scala comes with plenty of assistants supporting your driving skills on the road, helping you with parking and even preventing collisions.

Lane Assist

Operating at speeds above 65 km/h, this system can help to keep the car in the correct lane.

Front and rear parking sensors

Parking the Scala is easy due to its excellent manoeuvrability. What is more, you can be assisted by parking sensors integrated in the rear and front bumper, which check the car's distance from any obstacles.

Rear-view camera

Providing you with comfort and orientation during a parking procedure, the rear-view camera uses a camera located on the tailgate handle. Working with the infotainment screen, the system shows the space behind the car and indicates the driving line, based on the vehicle width.

Driver Alert

Driver alert reduces the risk of fatigue-induced emergency. By monitoring driver behaviour, the system assesses the degree of driver fatigue and, if necessary, warns of the need for a rest and break in the journey.

Customisation
