

Corolla Cross

Please Note: information is accurate as at December 2022.

Specification and imagery are indicative and should only be used as a guide. Vehicle and accessory specification, features, colour and trim may differ at the time of vehicle delivery.

A woman with long dark hair, wearing a patterned orange dress, is captured mid-jump on a trampoline. She is smiling and her hair is blowing in the wind. The background shows a sunset over a rural landscape with trees and a fence. The text "OH WHAT A FEELING" is overlaid in large white letters across the center of the image.

OH WHAT A FEELING

You'll feel it with every drive. In every twist and every turn. It's our unwavering commitment to move you, not only today, but well into tomorrow as we relentlessly reimagine the future of mobility.

With our eyes on the horizon, we're committed to creating a future where all of humankind is empowered with the freedom to move.

Everyday happiness

With so much to experience and explore in today's world, Corolla Cross provides you with the confidence you need to enjoy it all. From urban adventures to out of town excursions, you'll have the versatility, innovation and comfort to get there and home again with a smile on your face.

Corolla Cross is built for tomorrow. With its SUV inspired ride height, you'll travel in elevated comfort surrounded by stress-free space with clever technology to keep you connected with your world, including real-time information and remote features on Toyota Connected Services¹ via a subscription with myToyota Connect app. You can also engage the advanced engineering of the latest Hybrid Electric system to help you run cleaner and with greater efficiency.

With the latest Toyota Safety Sense² features including Pre-Collision Safety system, Lane Change Assist and eight SRS Airbags, you'll be well equipped to be protected and have assured peace of mind.

Corolla Cross allows you to navigate easily through every day and every adventure.

Front cover: Corolla Cross Atmos shown
This page and next: Corolla Cross GXL shown

Space and style to move

Every element of Corolla Cross has been designed to deliver bold strength and capability, met with refined urban attitude and elegance.

The dynamic body shape runs along a diagonal axis with the aerodynamically tapered cabin flowing into an imposing rear-end with an assured on-road stance.

The powerful pushed forward front-end projects an imposing presence. It houses the Bi-Beam LED headlamps that produce expansive illumination

using reduced energy, as well as the expressive lateral Daytime Running lamps for always-on visibility. The rear combination lamps use surface light emitting inner lenses on GXL and Atmos to provide more precise illumination.

Tactically placed front air spats lower air turbulence and reduce the drag coefficient value to help enhance fuel efficiency and reduce noise, while both exterior rearview mirrors automatically retract when parked.

Dynamic 17" alloy wheels help provide confident stability on various surfaces, rising to 18" alloys with uniquely designed performance inspired spokes on the Atmos grade.

Walk to the rear-end on the Atmos and the boot kick sensor works in tandem with the Power Back Door to allow the boot to open and close, even when you have your hands full. While inside the Atmos, the panoramic moon roof floods the interior with natural light; creating an open feel when on the road.

Find freedom

• • • • •
Inspired by real-world urban living, the Corolla Cross interior presents a confident, powerful and premium expression of style.

The generous instrument panel integrates with the door trim and wraps effortlessly from door to door. The expansive windows allow superior wide-angle visibility, creating an impression of space opening before you.

Hues have been carefully matched throughout and the interior ornamentals feature a sharp cross section silver highlight design. This urban elegance is contrasted by the reassuringly sturdy console pillars and door grips.

The spacious boot space in GX features class-leading 425L capacity with the convenience of an easy to load shelf height.

The seats are carefully designed and placed to make it easier to get in and out of the car. They're finished in leather accented material in Corolla Cross Atmos; plush combination leather accented in GXL and refined fabric in GX. The front seats also feature a unique silhouette that unifies the headrest, shoulder and seat cushion for superior comfort and posture support on longer weekend trips or simple workday commutes. With a concaved rear profile, they also allow greater knee space for passengers sitting behind to deliver greater cabin space for all.

Switched-on and ready

The advanced technology within every Corolla Cross helps make travelling a breeze with everything you need easy to reach, control and see.

With smart entry and start, you can hop into the Corolla Cross and get going even when your keys remain in your pocket or bag.

Steering wheel switches allow you to quickly manage functions and change displays without your hands having to shift off the wheel. On the Atmos grade, enjoy a heated leather accented steering wheel for additional comfort and control.

On the Atmos grade, a 12.3" full digital Multi Information Display (MID) delivers its speed, driving and performance details as a three-dimensional cluster with a choice of four different displays. The 7" colour MID in GX and GXL delivers real-time trip information and other important driving and engine data also in a choice of display options.

A high resolution 8" colour touchscreen audio display is available in GX or 10.5" in GXL and Atmos. The display controls the six-speaker audio system or live-sounding nine speakers in Atmos. The system also features Android Auto™,3,4 and wireless Apple CarPlay®4,5 connectivity with voice activation control with Siri™ and Google Assistant™ when paired with compatible devices.

Corolla Cross also integrates seamlessly with Toyota Connected Services¹ to offer improved safety, security and convenience for a better driving experience. The inbuilt communication device includes remote features such as climate control and remote start for additional convenience. It can also deliver warnings direct to a Toyota dealer as well as a Driver Pulse⁶ score to help improve your driving. The built-in Voice Command allows you to dictate functions such as window openings, climate control, the audio system and operating the latest connected navigation with comprehensive map coverage, even in regional areas.

You'll also have Bluetooth®7 connectivity and a USB charging port⁸ as well as a DC12V socket.

All-round comfort in any weather is also assured with a highly efficient air conditioning unit, including dual zone on GXL and Atmos, to carefully manage airflow and ensure all-round comfort even on the hotter days, with nanoe™,9X air conditioning technology on Atmos.

Toyota Connected Services¹

12 months complimentary access¹

Driving should be easy, enjoyable and safe. That's why inside every connected Toyota you'll find a suite of advanced features focused on safety and convenience for a better driving experience, all seamlessly integrated into the myToyota Connect app.¹

Learn more, and discover the Toyota Connected Services on your vehicle by visiting toyota.com.au/connected

For Toyota Connected Service Packages see toyota.com.au/connected/plans-packages

Test drive the app now, no Toyota required:

Safety and Security

People and property are precious. Toyota Connected Services' advanced features are designed to help protect them all. In emergencies, you can utilise push-button SOS Emergency Call^{10,11} (SOS). It contacts Toyota Emergency Assistance directly, guiding services to your location. In the event of a collision, Automatic Collision Notification^{10,12} (ACN) is designed to activate, calling you directly in-car, and if you are unresponsive, dispatching emergency services to that location. Should your car be reported stolen, Stolen Vehicle Tracking^{10,13} (SVT) will utilise vehicle tracking technology via our Stolen Vehicle Assistance Call Centre to help police to potentially recover your vehicle.

Remote Connect

Control vehicle functionality, even when you're not in the driver's seat. Our Connected features enable you to remotely start your engine (up to 10 mins prior), lock and remote horn buzzer, hazard and headlights. Perfect for locating your vehicle in a crowd, or just flagging emergencies. You can even heat or cool your car automatically before you step in with Toyota's Remote Climate Control feature.

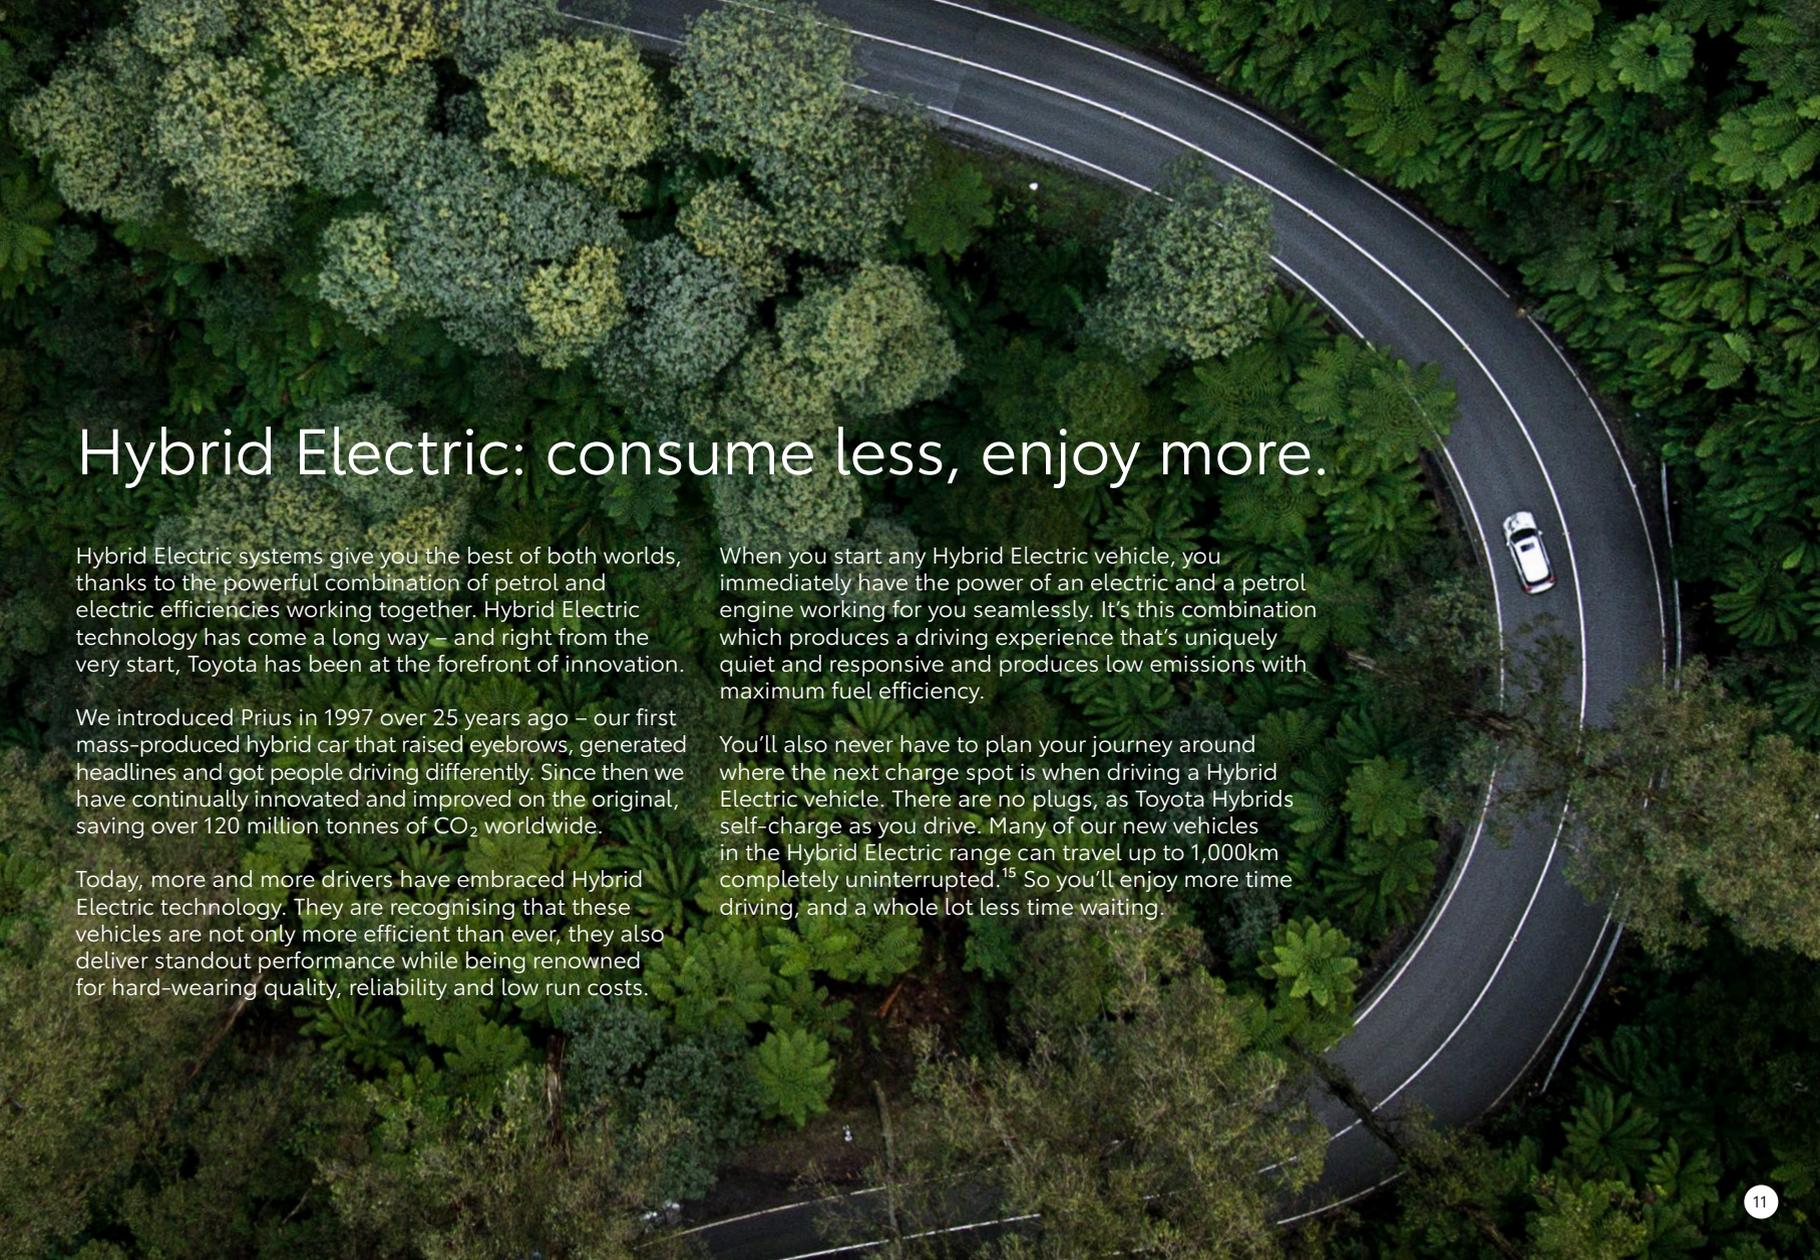

Driver Insights

The myToyota Connect app gives you a complete view across your entire drive. Review recent trips and, with Drive Pulse Score,⁶ understand how braking and cornering can be improved to help maintain your car. The features let you run quick checks on odometer, fuel levels and distance to empty¹⁴ to aid journey planning. You can also spot unlocked doors or windows left open away from your car using the in-app Vehicle Status features, and set up alerts. A Vehicle Locator also helps you find where you last parked, and our Glove Box feature opens access to digital warranty and manuals for you.

Multimedia Connect

Toyota's interconnected multimedia platform includes Connected Navigation which provides current parking availability, traffic, weather and fuel prices for your journey. Through Connected Voice Assistant, control vehicle features including navigation, audio and climate settings. With Connected Trip Start and Finish features you can plan routes, search a point of interest and send it to your car. When driving and not reaching your endpoint, the app notes the full route when you park, allowing you to continue navigation on foot with your phone or device.

Hybrid Electric: consume less, enjoy more.

Hybrid Electric systems give you the best of both worlds, thanks to the powerful combination of petrol and electric efficiencies working together. Hybrid Electric technology has come a long way – and right from the very start, Toyota has been at the forefront of innovation.

We introduced Prius in 1997 over 25 years ago – our first mass-produced hybrid car that raised eyebrows, generated headlines and got people driving differently. Since then we have continually innovated and improved on the original, saving over 120 million tonnes of CO₂ worldwide.

Today, more and more drivers have embraced Hybrid Electric technology. They are recognising that these vehicles are not only more efficient than ever, they also deliver standout performance while being renowned for hard-wearing quality, reliability and low run costs.

When you start any Hybrid Electric vehicle, you immediately have the power of an electric and a petrol engine working for you seamlessly. It's this combination which produces a driving experience that's uniquely quiet and responsive and produces low emissions with maximum fuel efficiency.

You'll also never have to plan your journey around where the next charge spot is when driving a Hybrid Electric vehicle. There are no plugs, as Toyota Hybrids self-charge as you drive. Many of our new vehicles in the Hybrid Electric range can travel up to 1,000km completely uninterrupted.¹⁵ So you'll enjoy more time driving, and a whole lot less time waiting.

The Hybrid System

Four Key Benefits

Toyota's latest Hybrid Electric technology gets you moving powerfully and smoothly every time. Enjoy an uncompromising drive with responsive, dynamic performance.

Quiet

The quieter and calmer experience in a Toyota Hybrid Electric is proven to deliver one of the most satisfying and enjoyable drives on the road, with no compromise on vehicle responsiveness. It's why millions of Hybrid drivers choose never to go back to petrol-only engines once they've made the switch.

Reliable

Toyota's Hybrid Electric System offers the reliability and quality you can always expect from Toyota. It's technology that's been tested and trusted for over 25 years – so no matter where you go, you'll have peace of mind in every drive.

Powerful

Experience an uncompromising drive in a Toyota Hybrid Electric with responsive, dynamic performance. You get impressive off-the-line torque that gets you moving powerfully and smoothly every time.

Starting off

The electric motor is used primarily and power stored in the battery is used to turn the motor.

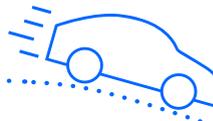

Full acceleration

When accelerating or cruising at speed, the petrol engine turns on automatically in addition to the electric motor. Ensuring you receive the power and responsive performance you need.

Braking and deceleration

The electric motor generates power when braking and slowing down, charging the battery. No fuel is used, so there are minimal CO₂ emissions.

Normal driving

A mix of petrol and electric power is used for best economy, depending on the conditions. The battery is recharged where possible.

At rest

With the car brought to a stop, the petrol engine cuts off. The system automatically avoids idling to conserve fuel and reduce CO₂ emissions.

Ready to go where you choose

Corolla Cross packs the performance and practicality you need to enjoy driving in or out of the urban environment, including enhanced acceleration and vehicle speed control on Hybrid models to help improve driver response.

On Hybrid AWD models, the latest electric AWD technology provides greater versatility, stability and control when driving on different terrain including slippery slopes, dirt and snow.

On every Corolla Cross, outstanding on-road comfort has been achieved by matching the high-rigidity body with finely tuned and tested suspension for a more assured ride, greater stability and control. On the open road, All-Speed Active Cruise Control² automatically maintains a set distance between you and the car in front.

The advanced braking systems have been optimised across the range to work with the

suspension geometry to help you stop and corner with greater confidence on variable road surfaces and conditions.

Hybrid Electric variants also come equipped with the latest generation lithium ion battery that produces 15% more output compared to previous generation Hybrid Electric System.

Go with a smile

Every drive becomes a joy in Corolla Cross with abundant power and response coming from the choice of a highly efficient Hybrid Electric System or with proven petrol drivetrain.

The latest generation 2L Hybrid Electric engine produces up to 146kW of power and features the latest in weight saving technology for enhanced performance and outstanding fuel efficiency.

Three drive modes (NORMAL, ECO, POWER) are available with the Hybrid Electric System. Choose ECO mode to help enhance the fuel economy. In POWER mode, you'll enjoy greater drive response for a more spirited drive.

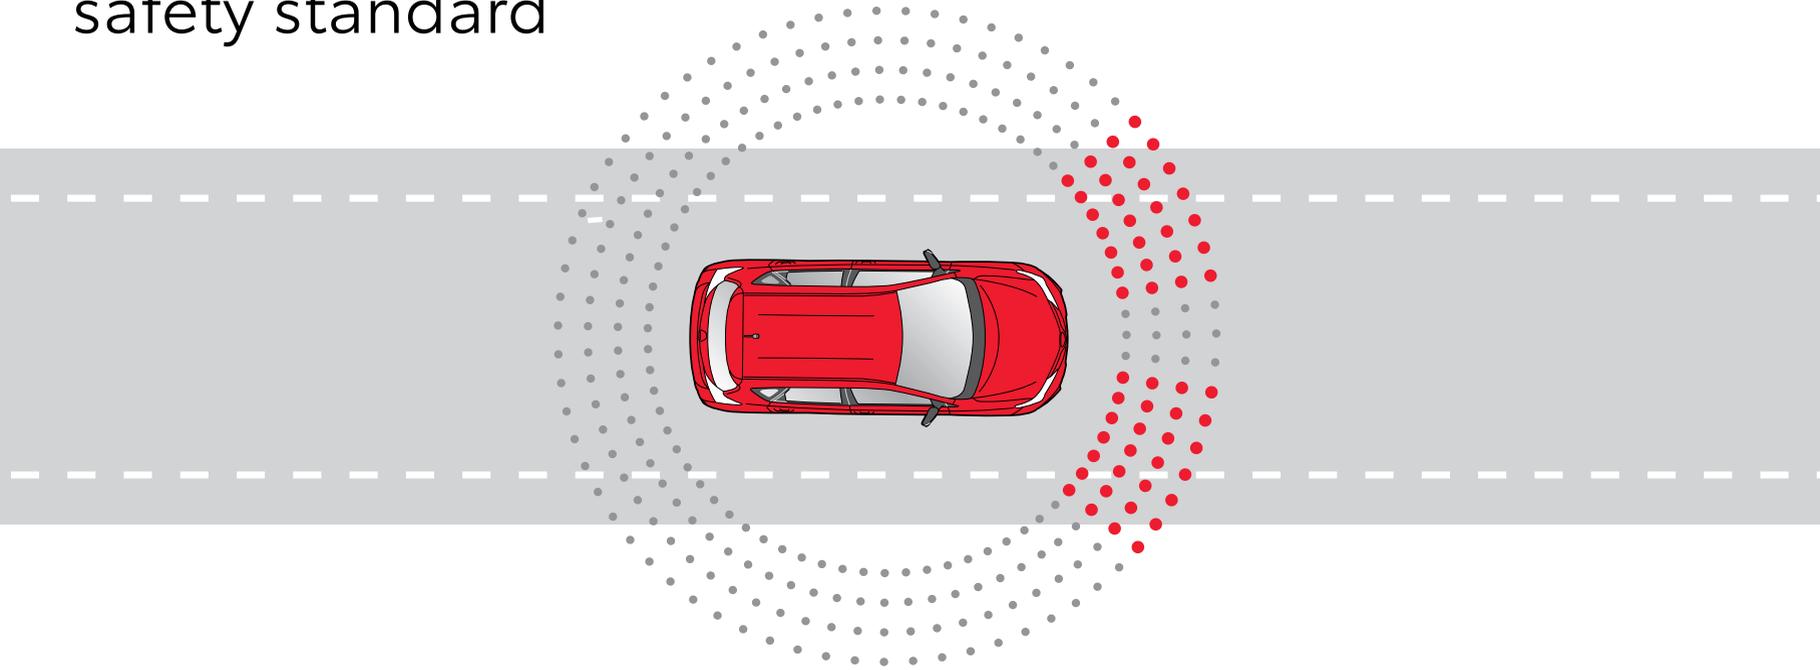

A separate electric motor drives the rear wheels on AWD models to help enhance on-road climbing performance and cornering stability.

The 2L 4-cylinder petrol engine with Dual VVT-i produces up to 126kw of spirited power. Its dynamic range of fuel injection helps optimise performance, improve efficiency and reduce emissions. In POWER mode the performance is stepped up to elevate the driving sensation, with the 10-speed Sequential Shiftmatic control also enhanced to help the driver achieve crisper, sportier gear changes.

The direct shift Continuously Variable Transaxle transmission helps enhance acceleration, fuel efficiency, and quietness. The combination of belt and gear transmission helps deliver smooth and direct acceleration for a genuinely enjoyable driving experience.

Raising the safety standard

When it comes to safety, Corolla Cross provides you with the reassurance of Toyota's advanced safety features including innovative Toyota Safety Sense² (TSS) technology as standard.

Coupled with an impact absorbing body structure to help disperse impact away from the driver and passengers, there are also eight SRS airbags to help protect you, including a front row SRS centre airbag to help keep front row passengers separated.

The Anti-lock Braking System is designed to help prevent wheel lock-up and skipping, while Vehicle Stability Control helps counteract oversteer

or understeer when cornering. Traction Control automatically controls engine output or applies the brakes to the wheels that are skidding on slippery surfaces or where there's variable grip. Emergency Brake Signal alerts trailing vehicles if you're forced to make a sudden stop.²

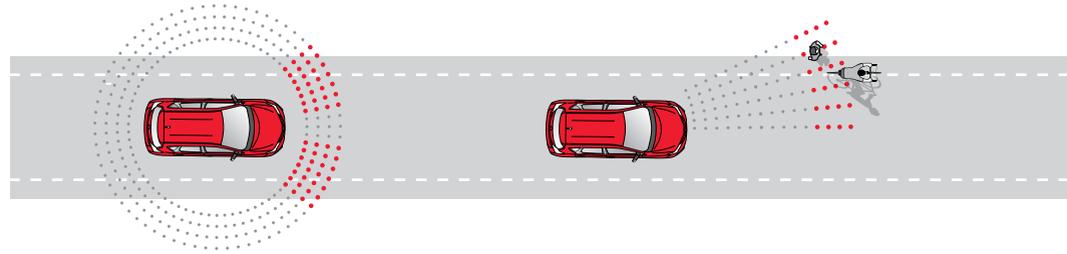

Plus, you'll have the support of intuitive TSS² technologies, including Lane Trace Assist, Pre-Collision Safety system with pedestrian and daytime cyclist detection and intersection turn assistance, Lane Departure Alert and All-Speed Active Cruise Control with Road Sign Assist.²

Toyota Safety Sense

At Toyota, we believe it's simply not enough to say "safety comes first" – we prove it. That's why, in our ongoing pursuit of creating ever safer cars, now and into the future, we developed Toyota Safety Sense² (TSS). A suite of active safety features designed to protect us all through helping to support safe driving.

Corolla Cross features the latest TSS driver assistance technologies, aiming to recognise and help avoid certain hazards and collisions, giving you and your passengers greater peace of mind wherever you're headed. Please visit toyota.com.au for vehicle and specification information.

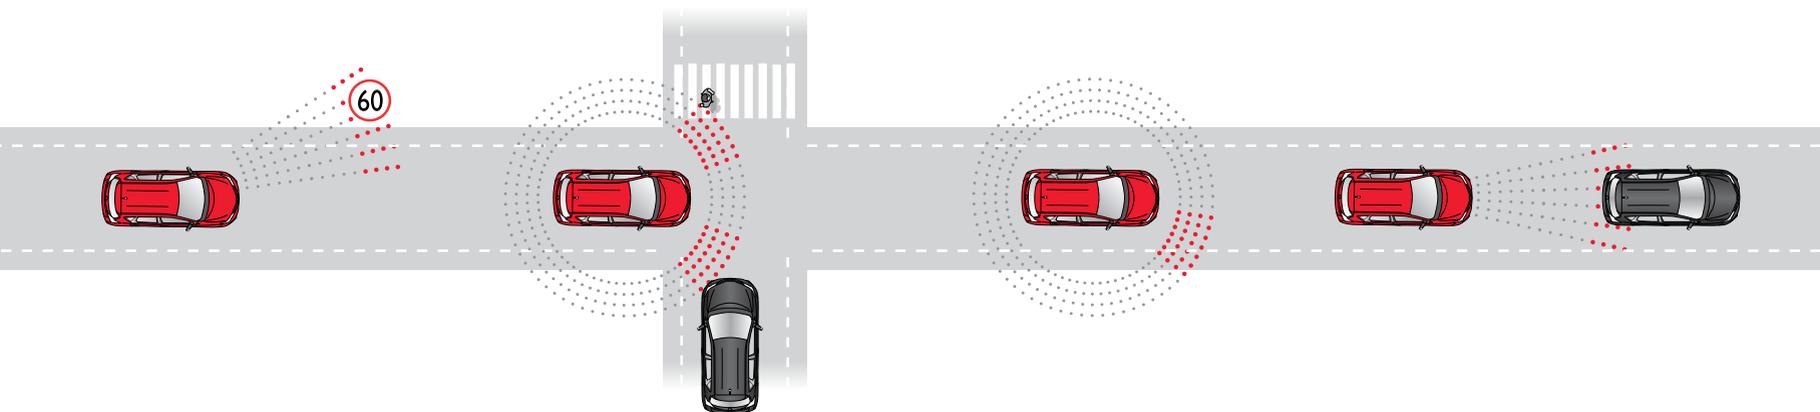

Lane Trace Assist

When driving on highways and freeways, Lane Trace Assist uses a camera to detect lane markings when cruise control is active and includes curve reduction system. It is designed to alert you and provide steering assistance to help avoid drifting, and keep you centred in your lane.²

Pre-Collision Safety (PCS) system with pedestrian and daytime cyclist detection

Pre-Collision Safety system with pedestrian and daytime cyclist detection is a multi-stage warning system. Using an integrated camera and radar to help detect other vehicles in front of you, the PCS is designed to assist the driver where there is a likelihood of frontal collision with cars and pedestrians during day or night, or cyclists during the daytime. PCS includes a visible and audible alert of possible collisions, additional braking force to assist when you're braking, and if a collision appears to be unavoidable automatic braking to help mitigate impact.²

Road Sign Assist (speed signs only)

Road Sign Assist was developed to help recognise certain road speed signs and provide information to you. It displays the most recently recognised speed limit on the Multi Information Display.²

Intersection Turn Assist

Intersection Turn Assist helps prevent accidents at intersections by detecting oncoming cars and pedestrians crossing the street when the vehicle is turning.²

Lane Departure Alert with steering assist

Lane Departure Alert with steering assist is designed to help prevent vehicles drifting from their lane by monitoring road markings, and providing a visible and audible alert should it detect any deviation from the lane. It may also apply additional steering force if needed to help you stay in your lane.²

All-Speed Active Cruise Control

All-Speed Active Cruise Control is designed to help keep a constant distance between vehicles. It uses a milliwave radar to monitor the gap between your vehicle and the one in front, automatically accelerating or slowing down when needed to help you maintain a set distance.²

- J Tow bar, tow ball and trailer wiring harness²¹ – sold separately

Unlock it all

When you join the Toyota family, you get so much more than a new car feeling. You unlock a whole range of benefits to keep you moving now and well into the future.

Discover your Toyota lifetime of advantages at toyota.com.au/owners

Toyota Genuine Accessories²³

Developed alongside the vehicle, this unique advantage allows Toyota to design accessories, so they integrate harmoniously with the vehicle structure and safety systems. For more information, visit toyota.com.au/accessories

Toyota Service Advantage²⁴

We'll keep the cost of your standard logbook service at a capped price for up to your first 3 or 5 years on the road, depending on the vehicle model. To find out your low capped service price, visit toyota.com.au/owners/service/service-pricing-calculator

Toyota Genuine Insurance²⁵

With Toyota Genuine Insurance you're not alone. Over 350,000* Toyota owners have made the same choice because they know their Toyota's in safe hands. For more information, visit toyotainsurance.com.au

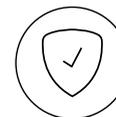

Toyota Access

Offering flexible finance options, lower monthly repayments²⁶ and a Guaranteed Future Value,²⁷ a Toyota Access Loan means you can drive the Toyota you want today, knowing the future is taken care of. When your loan ends, you have options to trade, keep or return your vehicle. For more information, visit toyota.com.au/toyota-access

Toyota Certified Pre-Owned Vehicles

Enjoy the reassurance that comes with a Toyota Certified Pre-Owned Vehicle. Including an additional 1-year Toyota-backed warranty,²⁸ full-service history and 90-point inspection by Toyota Technicians. For more information, visit toyota.com.au/certified

Toyota Warranty Advantage²⁹

Stick to your service schedule, and we'll extend your engine and driveline warranty from five to seven years, so you can drive stress-free for longer. For more information, visit toyota.com.au/owners/warranty

Disclaimers and Notice

- 1 Connected Services complimentary period ends 1 year from delivery date. Fees may apply thereafter. See toyota.com.au/connected/ plans/packages Not available outside Australia, if services disabled or terminated, or after 2033/Telstra 4G sunset (whichever comes first). Dependent on 3G/4G enabled DCM, GPS signal strength, mobile network coverage and other factors outside Toyota's control which can limit ability or functionality of system. Requires compatible device and app installation, third party info and mobile data. Mobile usage at user's cost. Check toyota.com.au/connected or your Owner's Manual for explanation of limitations. Features subject to change. Please drive safely.
 - 2 Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely.
 - 3 Android Auto™ and Google Now™ are trademark of Google LLC.
