Toyota Safety Sense

Toyota
Safety
Sense

Toyota Safety Sense (TSS) is standard across the range and uses technology with active intelligence to help protect you, including our Pre-Collision Safety (PCS) system with pedestrian and daytime cyclist detection, Lane Departure Alert (LDA) and Automatic High Beam (AHB). PCS aims to recognise specific hazards and may help avoid certain collisions, providing greater reassurance to the driver and passengers across a varying range of driving speeds and conditions.

Road Sign Assist (speed signs only) (RSA) detects certain speed signs, then uses a camera to display them on the Multi-information display. It provides a warning if you're exceeding the speed displayed on the sign,¹ while High-Speed Active Cruise Control¹ (ACC) automatically maintains the distance between you and the car in front on the highway.¹
