Confidence, refined. The all-new T-Roc

Introducing a new era for T-Roc. A compact SUV made for those who value thoughtful, modern design. With expressive new colours, refined lines, and intuitive features. The new T-Roc brings a natural confidence the moment you drive it.

Always confident. Shaped for the everyday. Discover the all-new T-Roc

A new generation of confidence

The all new T-Roc marks the next chapter in Volkswagen's SUV design story. As an all new generation model, it introduces mild hybrid technology as standard, delivering smoother driving, improved efficiency and effortless performance, while maintaining the confident, responsive feel T-Roc is known for.

Iconic details, re-defined

The design of the all new T-Roc is a confident evolution. Bold proportions, a dominant front grille and a striking two tone colourway give it a strong road presence, while sharper detailing and a distinctive C pillar create a look that's unmistakably Volkswagen.

Refinement you can feel

From the moment you drive off, the new T-Roc feels composed and confident. Carefully tuned suspension and responsive steering deliver a smooth, balanced drive, while advanced driver assistance systems work quietly in the background, supporting every journey with ease and assurance.

Designed to elevate your everyday

Thoughtful features like the 'Easy Open/Close' sensor controlled tailgate, available on both Life and R-Line models, make everyday moments simpler. Smart interior design and intuitive controls ensure everything feels exactly where you expect it, whether you're loading groceries or setting off for a weekend away.
