

NEW OUTBOARD & INBOARD INTEGRATED LOW-WEIGHT FIFTH WHEEL SLIDER SYSTEMS (ILS)

In February 2018 new Outboard Integrated Slider Systems are available in New Zealand. This now consolidates our range, providing both Inboard & Outboard mounting options for the NZ market.

Holland ILS Fifth Wheel Slider Systems provide superior weight savings & enhanced performance.

SAVES WEIGHT: The ILS Slide System saves up to 62 kg when compared to the traditional Holland slide systems.

Improved air cylinder provides a smaller design to sit up under the top plate to keep it protected from damage and debris.

Quick & Easy Height Change: Slide brackets can be changed without torching, grinding or welding. Brackets bolt on through the top and can be changed in 15 minutes or less.

New bushing design improves the life of the bushings & adds cushion from side-to-side load.

Available with FW35, FW31 & FWAL fifth wheels.
