

TRIOMATIC COUPLINGS WITH IMPROVED DESIGN

With a new **TrioMatic** design we have responded to the stringent requirement of customers to differentiate the **WABCO TrioMatic** coupling from copy or fake parts.

We have improved the design of this safety component by making adjustments to the wear-intensive areas, casting and overall product appearance.

IMPROVEMENTS

Male part coupling forehead is machined to provide better sealing

- Using a different casting method made the parts lighter while maintaining corrosion resistance and strict tolerances
- The look of the part has been improved by implementing the **WABCO** corporate design

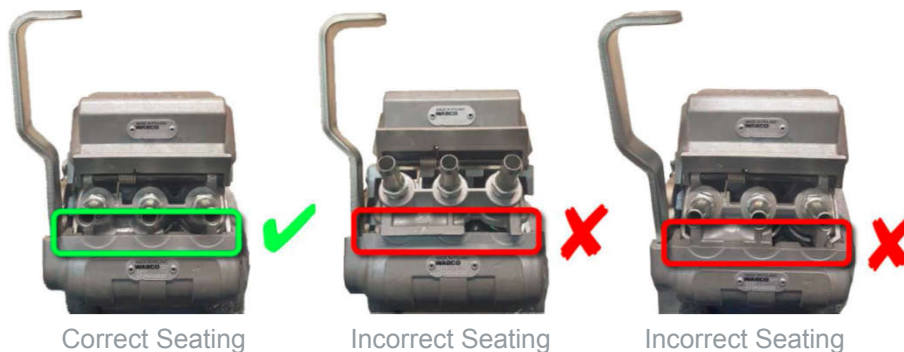

VARIANTS

Variant	Male	Female
Product number	452 808 002 0	452 806 000 0
Product		

CONNECTION

Make sure parts are connected in the correct way:

- Open jaws
- Place male part inside
- Pull male part down to seat
- Release handle, allowing the jaw to close and clamp successfully

TRIOMATIC COUPLINGS WITH IMPROVED DESIGN

INTERCHANGEABILITY

Due to the design improvements you may encounter difficulties when matching the new improved male part and the old female part. This can easily be overcome by positioning the male part precisely into the female connector.

All other combinations between new/new couplings and old/new couplings match well and the connection is tight and secure.

Information on WABCO products can be found in our **INFORM product catalogue** (inform.wabco-auto.com) by entering the product number in the "Product Number" search field.
